June 2000

Honourable Dr. Lyle Oberg
Minister
Alberta Learning
227 Legislature Building
10800-97 Avenue
Edmonton, Alberta
T5K 2B6

Dear Dr. Oberg:

I am pleased to provide you with the eighth annual report of the Alberta Apprenticeship and Industry Training Board. This report covers the Board's operations and achievements for the period April 1, 1999 to March 31, 2000. It also presents a statistical overview of the Alberta apprenticeship and industry training system.

Respectfully submitted,

C.J. (Cliff) Williams
Chairman
Alberta Apprenticeship and Industry Training Board

A MESSAGE FROM THE BOARD CHAIRMAN

As we begin another year of challenging work, I am proud to chair Alberta's Apprenticeship and Industry Training Board.

The theme of this year's annual report, ***Strengthening the Foundation***, was chosen for a number of reasons. First and perhaps most importantly, it signifies the importance of our industry advisory network. These industry, community and government partnerships are the foundation of Alberta's apprenticeship and industry training system. To ensure future success, we need to support our network partners in their efforts to make the system work and thrive.

Strengthening the Foundation also represents the importance of building on our earlier successes. 1999-2000 was another year that the work of the Board was guided by a Strategic Plan. The Plan springs from ongoing public consultations and is consistent with the business plan of Alberta Learning. It will continue to be a framework for implementing new policies and actions. Major achievements for 1999-2000 were in the areas of communication, training and standards, and include:

- Implementing the *Industry Advisory Network Effectiveness Plan*, which included a highly successful workshop attended by over 200 network members. An action plan is being developed.
- Strengthening communication and partnerships with industry (employers and employees), government, apprentices and public.
- Support for continuing expansion of alternatives in training including more modularization and greater flexibility in time and place of delivery.
- Continuing collaboration with training institutions and industry partners to deliver quality technical training.
- Continuing follow-up on recommendations from industry consultations. Focuses on proposed changes to the *Apprenticeship and Industry Training Act* that would enable the Board's recommendations to be fully implemented while maintaining high industry standards.
- Supporting interprovincial labour mobility.

I am proud of our contribution and confident that the Board's current direction will help Alberta's apprenticeship and industry training system continue to embrace innovation and ensure responsiveness, affordability, effectiveness and accessibility.

C.J. Williams
Chairman

APPRENTICESHIP AND INDUSTRY TRAINING IN CONTEXT

Alberta's apprenticeship system is driven by industry. The system relies on an Alberta-wide network of committees that represent the interests of over 50 trades and crafts, and four occupations.

85% of employers indicated that certified journeymen and apprentices contributed to their competitive edge and profit margin.

- Alberta has 50 designated trades and four designated occupations.
- From 1993 to 1999, 30,313 certificates were issued to completing apprentices.
- Although the time varies by trade, apprenticeship training in most of Alberta's 50 designated trades typically takes three to four years.
- On average, apprentices spend 80% of their time in on-the-job training and experience and 20% of their time in technical training at an institution.
- Employers hire and register apprentices, pay wages, provide supervising journeymen and in some cases, also provide equipment to training institutions.
- Apprentices pay tuition fees toward the cost of their technical training.
- Alberta taxpayers fund the primary, secondary and a large part of the post-secondary school system; the development of technical training for apprenticeship, and the administration of apprenticeship and industry training.
- While Alberta's apprenticeship system is supported by government, it is *driven* by industry. Under the guidance of the Board, the system relies on an Alberta-wide network of local and provincial apprenticeship committees, and occupational training committees (LACs, PACs and OTCs), representing the interests of more than 50 trades and crafts, and four occupations. Among the many responsibilities of this network are to set industry-based standards and develop course outlines upon which the technical training is based.
- A recent Board survey showed that *employers* are satisfied with the apprenticeship training system:
 - 95% of employers were satisfied or very satisfied with the skills of their certified journeymen.
 - 86% of employers, associated with the system, were satisfied or very satisfied with the system.
 - 89% were satisfied or very satisfied with the content of their trade's technical training program.
 - 85% of employers indicated that employing certified journeymen and apprentices contributed to their competitive edge and profit margin of their firms.
- A recent Board survey found that *apprentices* are satisfied with the apprenticeship training system:
 - 91% of 1997-1998 graduates were very or somewhat satisfied with the overall quality of their work experience.
 - 93% of 1997-1998 graduates were very or somewhat satisfied with the overall quality of their technical training.
 - Based on their experiences with apprenticeship training, 94% of the 1997-1998 graduates would still become an apprentice.

APPRENTICESHIP AND INDUSTRY TRAINING: THE BOARD AND THE SYSTEM

The vision and principles of the apprenticeship and industry training system are consistent with the principles for Alberta's learning system as a whole.

Alberta's apprenticeship and industry training system is an industry-driven partnership. That partnership is the basic foundation of the system.

Vision

Alberta's apprenticeship and industry training system will continue its leadership role in developing Alberta's highly skilled and trained workforce. In keeping with the goals of Alberta Learning, the system will provide quality programs that are responsive, flexible, accessible and affordable; enable learners to demonstrate high standards; prepare learners for life-long learning, work and citizenship; develop and maintain effective relationships with partners, and operate responsibly and responsively.

Principles

Following are the underlying principles of Alberta's apprenticeship and industry training system:

- Albertans who wish to pursue a career in the trades or designated occupations have opportunities to participate in apprenticeship and industry training and work toward acquiring the highest possible standards of knowledge and skills.
- Apprentices and trainees will make a financial contribution to the costs of technical training consistent with the benefits they receive.
- Provincial and interprovincial industry standards are the foundation of apprenticeship and industry training in Alberta. Industry, consisting of employers and employees, is responsible for setting training criteria and standards, and for providing on-the-job training and work experience.
- Government, with input from industry, has a role in regulating apprenticeship training and in helping Albertans to acquire the skills and competencies required to work in the trades and designated occupations.
- Apprenticeship and industry training is based on effective partnerships between and among government, industry, and apprentices and trainees. Training institutions are key participants in the system.

Board Mandate

To support the vision, the Board provides advice to the Minister of Learning on the training and certification of people in designated trades and occupations, and on the needs of the Alberta labour market.

Other specific functions of the Board include:

- Setting training and certification standards in all trades and designated occupations.
- Appointing people to provisional committees, local and provincial apprenticeship committees (LACs and PACs), and occupational training committees (OTCs).
- Developing regulations, with the approval of the Minister, regarding designated trades and designated occupations.
- Developing policies for recognizing training programs as equivalent to those provided under the Act.

-
- Reviewing requests for designation or re-designation of trades and occupations.
 - Recognizing apprenticeship and student work experience programs, as well as other training and work experience programs, as defined in the *Apprenticeship and Industry Training Act*.
 - Monitoring activities of PACs.

Board Membership

The Board consists of

- A chairman
- Four members representing employers in designated trades
- Four members representing employees in designated trades
- Two members representing employers in non-trade occupations
- Two members representing employees in non-trade occupations

Two Board members share a vice-chairman position.

Standing Committees of the Board

The Board has four standing committees to assist with its work:

- **Labour Market Issues and Board Operations Committee**
Monitors labour market activity and identifies industry training needs and opportunities, and addresses operational activities of the Board.
- **Industry Standards Committee**
Formulates policy and standards to meet emerging requirements of the apprenticeship and industry training system.
- **Provincial and Local Apprenticeship Committees' and Occupational Training Committees' Nominations Committee**
Monitors the operations of the apprenticeship and industry training advisory network and reviews nominations for membership in the provincial apprenticeship committees (PACs), local apprenticeship committees (LACs) and occupational training committees (OTCs).
- **Nominations Review Committee**
With the assistance of the Department, reviews applications and provides recommendations to the Minister regarding the appointment of Board members.

APPRENTICESHIP AND INDUSTRY TRAINING ADVISORY NETWORK: AN INDUSTRY DRIVEN PARTNERSHIP

The Board steers the system. But the system relies on the province-wide network of LACs, PACs & OTCs operating at the grassroots level.

While Alberta's apprenticeship and industry training system is supported by government, it is *driven* by industry, a term that includes both employers and employees.

The Board steers the system. But the system relies on a network of local and provincial apprenticeship committees and occupational training committees (LACs, PACs and OTCs), representing the interests of more than 50 trades and crafts, and 4 occupations. The network is responsible for setting standards and developing course outlines upon which technical training is based.

The Board, LACs, PACs and OTCs are composed of equal numbers of employers and employees.

Key Participants: Everyone has responsibilities

Employers and Employees through LACs, PACs, OTCs

- Monitor changes in their trade and identify the need for improvements to both on-the-job and technical training.
- Set standards for the skills and competencies required for certification in their trade.
- Develop technical training content.
- Recognize related trades training and certification.
- Recognize training and certification from other jurisdictions.

Structure and Organization of the Alberta Apprenticeship and Industry Training System

The Alberta Government

- Provides the framework within which this activity takes place.
- Supports employers and employees who are developing training content and standards.
- Promotes apprenticeship training and certification programs.
- When needed, reimburses committee members for travel and living expenses and pays a modest honorarium.

The Technical Institutes and Colleges

- Work with the Board and the industry advisory network of LACs, PACs and OTCs to enhance access and responsiveness to industry needs through delivery of technical training.
- Develop lesson plans from industry's course outlines.
- Teach technical training to apprentices.

Alberta Government Restructuring – May 1999

Premier Klein announced a major restructuring of the Alberta Government in May 1999. The Apprenticeship and Industry Training division is now part of Alberta Learning, a new Ministry which has been reconstructed of parts of the former Advanced Education and Career Development, and Alberta Education. Restructuring within the new Department was completed during 1999-2000. Apprenticeship and industry training remains a core business of the Department. Because Alberta Learning includes the kindergarten to grade 12 learning system, there are new opportunities for collaboration on activities such as the Registered Apprenticeship Program (RAP) and school-to-work transition.

HIGHLIGHTS OF 1999 - 2000

The strategic plan guides the Board's work. It is compatible with the business plan of Alberta's learning system as a whole.

A Responsive Strategic Plan

During 1999-2000, the Apprenticeship and Industry Training Board continued to implement a strategic plan. The plan guides the work of the Board. It is through the plan that the Board strives to achieve the vision for apprenticeship and industry training in Alberta.

The plan serves as a framework for implementing new policies and actions. Adjustments are made on a continuous basis to ensure that the Plan remains responsive to emerging concerns and issues.

The goals, objectives and key performance indicators of the strategic plan are consistent with those set out in the business plan of Alberta Learning.

Goals

The Board has established three goals to help it successfully fulfill its role and move towards the vision of the apprenticeship and industry training system. It recognizes that innovation must play an integral role in reaching the goals.

1. Communication: Strengthening and Developing Partnerships

To promote apprenticeship and industry training in Alberta by strengthening and developing partnerships.

2. Training: Effective, Efficient and Responsive

To encourage and support work experience and technical training.

3. Standards: High Quality in Training and Certification

To develop and maintain high standards of training and certification.

Major Achievements of the Plan

Major achievements in the second year of the strategic plan are as follows. They are grouped according to the goal they support.

1. Communication: Strengthening and Developing Partnerships

The Apprenticeship and Industry Training Board recognizes that effective communication with all partners is essential to the continued success of the apprenticeship and industry training system. During 1999-2000, the Board took steps to enhance communication with and involvement of a variety of partners including industry, employers, and apprentices.

The strength of the Alberta apprenticeship and industry training system is that it's a "bottom up" system. It is through the knowledge, expertise and commitment of industry on the LACs, PACs, and OTCs that the system has grown and thrived. But we can't afford to be complacent."

*Cliff Williams
Board Chair*

Industry Advisory Network Effectiveness Plan

Strengthening the industry advisory network through better communication was a key focus for the Board during 1999-2000. In response to what the Board heard during industry consultation, the Board continued implementation of its *Industry Advisory Network Effectiveness Plan*. The plan is a framework for strategies to strengthen the overall functioning of the network. There are five main objectives under the effectiveness plan:

- To improve PAC/LAC/OTC structure,
- To increase interaction between PACs/LACs/OTCs, the Board and industry,
- To promote PACs/LACs/OTCs through a variety of means,
- To promote PACs/LACs/OTCs through the *Update* newsletter, and
- To provide PACs/LACs with improved resource material.

Following are some of the key initiatives implemented under the effectiveness plan.

Industry Advisory Network Workshop

The Board sponsored an Industry Advisory Network Workshop on October 24 - 25, 1999 in Edmonton to find ways to strengthen the collaboration and cooperation within the advisory network system and with the various industries.

Over 200 people representing various parts of the industry advisory network attended the workshop. Participants included presiding officers of PACs and LACs, and OTCs, Board members, and Apprenticeship and Industry Training division staff from Alberta Learning. Workshop participants brought forward a wide range of proposals to improve the

Industry Advisory Network. Strategies on which the Board, along with LAC, PAC, and OTC members intend to focus include:

- improve links between LACs and PACs,
- improve communications, and
- improve LAC meetings.

Other proposals were also brought forward, including business plans for PACs and LACs, new promotional strategies and “self-evaluation” surveys for PACs and LACs to administer annually. The Board has discussed what specific actions could be taken between the Board, LACs, PACs and Department staff in these areas. In 2000-2001, work will proceed on developing detailed strategies and initiatives. These actions will be presented to the Board for approval later in the year.

Due to the overwhelming success of the workshop, the Board agreed to hold another industry advisory network workshop within the next two years.

Other actions to strengthen the network

In addition to the workshop, other actions to enhance the industry advisory network during 1999-2000 included:

- A special edition of the ***Update*** newsletter provided detailed information about discussions, outcomes, possible action steps and excerpts from the keynote address.
- A new resource manual for LAC and PAC members was produced and distributed to all committee members, presiding officers and committee secretaries. The manual is intended to provide concise and useful information on all aspects of the apprenticeship and industry training system.
- The following presiding officers and other representatives of the PACs attended Board meetings throughout the year: agricultural mechanic, autobody technician, automotive service technician, bricklayer, cabinetmaker, crane and hoisting equipment operator, electrician, electronic technician, elevator constructor, floorcovering installer, gasfitter, glazier, hairstylist, heavy equipment technician, insulator, lather-interior systems mechanic, locksmith, plumber, power system electrician, recreation vehicle service technician, refrigeration and air conditioning mechanic, sheet metal worker, steamfitter-pipefitter, tool and die maker, and water well driller.

“...it’s one thing to get to the issues, but to get to the actual solutions - that great. And now they’re going to form an action plan from what we discussed. That’s even more than I hoped!”

*Industry Advisory Network
Workshop Participant*

Enhancing communication with employers, apprentices and training institutions

- The Board chairman and the executive director of Apprenticeship and Industry Training continue to visit Alberta training institutions to meet their board members, senior officials and apprenticeship instructors and to tour facilities.
- Deans and other senior representatives from the Northern Alberta Institute of Technology (NAIT), Southern Alberta Institute of Technology (SAIT), Olds College, Lethbridge Community College and Red Deer College attended Board meetings to provide advice, make presentations and participate in discussions.
- The ***Update*** newsletter continues to be published on a regular basis. With a circulation of 60,000 the newsletter has been well received as a way to hear about the latest developments in apprenticeship and industry training and in each of the designated trades and occupations.
- The Apprenticeship and Industry Training website (www.tradesecrets.org) continues to be enhanced, including better links with the Alberta Learning Information Service (www.alis.gov.ab.ca), a career planning and career information website.

Encouraging Alberta industry to participate in the apprenticeship program

- During 1999-2000, an ambitious three-year Apprenticeship and Industry Training Communications Plan was continued. Year 2 initiatives being implemented include:
 - Continuous updates and posting of information on the Internet through the apprenticeship website www.tradesecrets.org.
 - New promotional materials to raise awareness of the apprenticeship system including lapel pins and “we support” decals for employers.
- The Board continues to partner with Alberta employers, and employer and employee associations to encourage them to register and train apprentices and employ certified journeymen. Officials from some of Alberta’s largest companies and organizations attend Board meetings as guests.
- The Board supported the efforts of the Construction Owners Association of Alberta (COAA) in developing a CD-ROM to encourage people to consider entering designated trades and occupations. The CD-ROM will be distributed to junior high and high schools, libraries and other educational institutions.

The Board continues to partner with Alberta employers, and employer and employee associations to encourage them to register and train apprentices and employ certified journeymen.

Enhanced communication with Department staff

In recognition of the important link between the Board and staff of Alberta Learning:

- All staff receive the ***Update*** newsletter.
- Staff are invited to attend Board meetings and committee meetings as

The Chairman regularly meets with industry officials representing a variety of perspectives.

Alternative forms of technical training give journeymen and apprentices access to the latest techniques and information at places and times more suitable to their own needs and circumstances.

appropriate. During 1999-2000, several staff members attended Board meetings as guests while others made presentations.

- In October 1999, directly following the Industry Advisory Network workshops, the apprenticeship and industry training division also put on a workshop for its entire staff. The executive director outlined key priorities for 1999-2000 and the outcomes of the workshop. The Deputy Minister shared the latest information on departmental restructuring and other key initiatives.

A higher profile for the Board and Apprenticeship and Industry Training

The Board Chairman continues to meet with the Minister, Deputy Minister, and other key government representatives on matters of mutual concern.

- The Chairman regularly meets with industry officials representing a variety of perspectives.
- The Board is involved in high profile conferences and events including the Minister's Forum on Adult Learning and Canadian Council of Directors of Apprenticeship (CCDA) Board Chairs were also co-hosts of the National Apprenticeship Conference in June 1999 in Winnipeg.
- During 1999-2000, the Board Chairman was elected Chairman of the Interprovincial Alliance of Board Chairs. The Alliance also meets with the CCDA on a regular basis.
- The Chairman attended two meetings in Halifax to explore the feasibility of a new national apprenticeship body. A new national body would assume similar functions to the former Canadian Labour Force Development Board and its National Apprenticeship Committee. The body would be composed of business, labour, educators and equity groups and would examine and make recommendations on apprenticeship issues.

2. Training: Effective, Efficient and Responsive

In 1999-2000, the Board continued to encourage and support its partners in providing effective and efficient apprenticeship training. New and enhanced initiatives included supporting the expansion of alternative forms of delivery, further modularization of training curriculum, encouraging the use of "train the trainer" programs, and exploring new ways to increase Aboriginal involvement in apprenticeship.

Alternatives in technical training

- Work to develop Individual Learning Modules (ILMs) for trades continued during 1999-2000. ILMs are standardized teaching materials for technical training in apprenticeship programs that will enable flexibility in delivery of technical training. The majority of project resources in 1999-2000 have been dedicated to writing modules in automotive service technician, heavy equipment technician, millwright and machinist trades.

“My apprentices get together and talk about what they learned that week. There is lots of interaction right on the job and they work on what they learned right away. WATS is an absolutely great program.”

*Employer of
apprentice cooks*

During 1999-2000, the Board endorsed the train the trainer concept and recommended that each provincial apprenticeship committee (PAC) consider it for implementation in their trade’s apprenticeship program.

Competency validation has concluded for 20 trades in five clusters. These trades are now adjusting their course outlines, based on data collected during competency validation process.

- In 1999-2000, the Board continued to work with training providers to enhance access and responsiveness to industry needs through alternative forms of technical training. The technical training component of an apprenticeship program was once only available as “block release” format, where an apprentice would attend technical training for four to eight weeks, depending on the trade. More options will continue to be developed for more trades. In 1999-2000, technical training options offered included:
 - Competency-Based Apprenticeship Training (CBAT). Apprentices learn at their own pace while at school. Now available in the carpenter, electrician, locksmith, and welder trades.
 - Distance delivery is now available in the electrician, locksmith and welder trades.
 - Mobile delivery is now available in the bricklayer, communication electrician, crane and hoisting equipment operator (boom truck operator), roofer, and tilesetter trades. During 1999-2000, mobile delivery was also offered in the appliance service technician trade.
 - Weekly Apprenticeship Training System (WATS) training is now available in the cabinetmaker, carpenter, cook, machinist, partsman, and welder trades.
- On site delivery also continued to be offered at the Alberta-Pacific Forest Industries Inc. (ALPAC) for the millwright trade.

Enhancing relationships with training institutions

- A representative from NAIT, SAIT, and the colleges attend each Board meeting. Guests from the colleges also attend on a rotating basis.
- The Board Chairman visited Keyano College, SAIT and NAIT during 1999-2000.
- The Board will continue to correspond with the institutions on apprenticeship training and other issues of mutual concern.

Improved methods of on-the-job training

- To date, the new “blue book” record book has been implemented in 28 trades. Another 20 have endorsed its development. Roofer and the refrigeration and air conditioning technician trades have continued with their current record books.
- Supporting journeymen in their role as trainers - “training the trainers” - is a priority for the Board. During 1999-2000, the Board endorsed the train the trainer concept and recommended that each provincial

apprenticeship committee (PAC) consider it for implementation in their trade's apprenticeship program. Training materials, including a video, are available. The concept has already been adopted by several PACs, including: carpenter, electrician, partsman, and sheet metal worker.

Keep training content current

- The Board and the provincial advisory committees (PACs) regularly review course content, including examinations, to ensure that it keeps up with emerging skill requirements. During 1999-2000, the Board, with recommendations from the respective PACs, approved updated course content for the following trades: boilermaker, cook, crane and hoisting equipment operator, elevator constructor, glazier, machinist, painter and decorator, partsman, and sheet metal worker. The Board also approved in principle changes to the Qualification Practical Exam for: crane and hoisting equipment operator, insulator, recreation vehicle service technician, and structural steel and plate fitter trades. The Board also approved a process to provide certification for construction craft labourer. In addition, the Agricultural Mechanic PAC has established detailed entrance requirements.

The General Motors and John Deere pilot projects were designed to meet industry needs for highly skilled and trained tradespeople. They were so successful, they will continue as industry-sponsored components of the regular apprenticeship program.

Meeting the skill requirement needs of industry

- The Outdoor Power Equipment Technician Provisional Committee recommended in 1998-1999 that outdoor power equipment technician become an optional designated trade. During 1999-2000, the Committee reviewed the results of a survey to determine support for optional trade or occupational designation. The Board will recommend to the Minister that the Outdoor Power Equipment Technician occupation be designated as a trade.
- The General Motors Automotive Service Technician Educational Program (ASEP) completed a four-year pilot program in June 1999. General Motors donated computer equipment, manuals, training materials, vehicles and vehicle components to NAIT and SAIT. The ASEP pilot project gave apprentices access to advanced technology and addressed industry needs for qualified service technicians trained on state-of-the-art equipment. The Board approved the ASEP program as a General Motors sponsored program under the umbrella of the Alberta Automotive Service Technician apprenticeship program.
- The John Deere Agricultural Technician pilot project moved into its final year during 1999-2000. The four-year program was intended to give apprentices access to advanced technology and addressed industry needs for qualified technicians trained on state-of-the-art equipment. During the pilot project, John Deere donated or loaned agricultural equipment, special tools, training aids, and staff training to Olds College. The Board agreed to continue the Agricultural Technician program as a John Deere

During 1999-2000, the Board continued to discuss Aboriginal initiatives within an apprenticeship context.

sponsored program to supplement the Alberta Agricultural Mechanic and Heavy Equipment Technician apprenticeship programs.

Supporting training for youth

- As part of the government reorganization carried out in May 1999, the Apprenticeship and Industry Training division became part of the new Department of Learning. The Department has responsibility for learning in Alberta, including Early Childhood Services to Grade 12 and adult learning. The Board is confident this will provide new opportunities to strengthen apprenticeship initiatives aimed at youth.
- The Board continued to support the Registered Apprenticeship Program (RAP). Through RAP, high school students get work experience in a trade while receiving credit towards a high school diploma and a journeyman certificate. There are more than 580 high school students in RAP, and an equal number of graduates are currently completing apprenticeships they started in high school.
- *CAREERS...The Next Generation Foundation* also received support and encouragement from the Board. *CAREERS...The Next Generation* promotes trades and technologies to youth. The Foundation works with industry to make new entry-level apprenticeship positions available to youth across the province.

Aboriginal initiatives

During 1999-2000, the Board continued to discuss Aboriginal initiatives within an apprenticeship context. A special committee of the Board has reviewed the report of the Aboriginal Projects Steering Committee, a group composed of: the Canadian Council of Directors of Apprenticeship, the Interprovincial Alliance of Apprenticeship Board Chairs, the Aboriginal community, Human Resources Development Canada and the National Apprenticeship Committee of the Canadian Labour Force Development Board. *Aboriginal Participation in Apprenticeship: Making It Work* contained 36 recommendations and an action plan.

The Board's committee will be examining possible initiatives to increase Aboriginal participation in Alberta's apprenticeship programs. Possible strategies may include expanding programs already aimed at Aboriginal people.

Increasing departmental effectiveness

- During 1999-2000, the Apprenticeship and Industry Training division undertook the *Business Process Re-engineering Project*. The project arose from a desire to enhance client service and is an initiative to re-engineer the automated and manual components of the administration of apprenticeship and industry training. The project included a review of business processes and information systems. The business processes

As a result of industry consultations, enhancements to the Apprenticeship and Industry Training Act have been recommended for introduction during the Spring 2000 sitting of the Alberta Legislature.

provided an opportunity for the division to re-organize work functions so that they would fit together more naturally. The overall goal is to help the division increase efficiency and therefore strengthen its ability to provide service and support to as well as collaborate with its internal and external clients. Next steps should include accommodations for new and evolving programs, automated scheduling of apprentices into technical training and data sharing both internally and externally to the Department.

3. Standards: High Quality in Training and Certification

Developing and maintaining high standards of industry training and certification continues to be a priority for the Board. Included in the Board's strategic plan are recommended enhancements to the *Apprenticeship and Industry Training Act*, continued development and use of Key Performance Indicators (KPIs), promoting responsive methods of trade certification, and the development of an interprovincial common core curriculum standard for the carpenter trade.

Following up on recommendations from the industry consultations: Changes to the Apprenticeship and Industry Training Act

As a result of industry consultations, changes to the *Apprenticeship and Industry Training Act* have been recommended for introduction during the Spring 2000 sitting of the Alberta Legislature. These changes will allow the Board more flexibility and responsiveness in dealing with apprenticeship issues. The following were developed after receiving input from partners throughout industry. The amendments would:

- **Allow the Board greater flexibility in finding solutions related to describing a trade.** For example, in the crane and hoisting equipment operator trade, the provincial apprenticeship committee would like to allow individuals who are not apprentices or certified journeymen but who have successfully completed training programs approved by the PAC to work on certain boom trucks (e.g. equipment operated by utility company workers). The recommended amendments to the Act would allow this to happen.
- **Remove program and process details such as entrance requirements and program length from the Act.** Program standards would continue to be set by the Board, on the recommendation of the PACs and OTCs representing the particular trade or occupation. This would ensure that program standards continue to reflect industry's needs.
- **Provide for competency based certification program in designated occupations.** The new focus would be on an individual's competencies, rather than on how those competencies were acquired. Providing for a competency based certification program would allow the Board to be more responsive to industry's needs. The provision of a competency based certification program is consistent with Alberta's current labour market practices and workforce development strategies.

- **Allow the implementation of changes to strengthen the operation of industry advisory committees.** Such changes could include giving committees more functions and simplifying processes.

There has also been a recommendation to update the *Act*, edit for clearer language and ensure consistency with the amendments that have been enacted since 1991.

Developing and maintaining industry standards

- Existing journeyman/apprentice ratios will remain in regulation, with the norm being one journeyman to one apprentice (1:1). All ratios in regulation will continue unless the Apprenticeship and Industry Training Board, in consultation with Provincial Apprenticeship Committees, recommends changes to the Minister.
- Wage percentages will also remain in regulation unless the Alberta Apprenticeship and Industry Training Board, in consultation with the applicable Provincial Apprenticeship Committee, recommends changes or removal to the Minister.

The Qualification Certificate Program provides a way to recognize competencies that a person has obtained through a review of prior work experience, knowledge and skills.

Promoting alternative and responsive methods of trade certification

- Criteria and process for designation of trades and occupations were developed and approved.
- The Qualification Certificate Program provides a way to recognize competencies that a person has obtained through a review of prior work experience, knowledge and skills. Successful persons are issued an Alberta Qualification Certificate. This certificate is a recognized trade certificate under the *Apprenticeship and Industry Training Act*.
- As in previous years, the Qualification program continues to be advertised publicly.
- The Board continued to promote the availability of the Achievement in Business Competencies (ABC) endorsement program for journeymen who have achieved skills in business and management and also approved the endorsement for Occupational Certificates. Journeymen and those with Occupational Certificates who qualify receive an ABC seal that is attached to their Alberta trade certificate.

93% of Alberta journeymen now have a Red Seal available to them. The Red Seal enables greater mobility of journeymen throughout Canada.

Work was completed on a pilot project for the carpenter trade to develop an Interprovincial Common Core Curriculum Standard. The curriculum standard, contents of the record book and apprenticeship item bank are now complete.

Supporting certification in designated occupations

- In October 1999, the Chairman attended an event to support the warehousing occupation and to celebrate the successful collaboration between the Armed Forces of the Department of National Defence, Fairview College and Alberta Learning. Warehousing became a designated occupation in 1996 and is in a growing sector of the economy. Training is provided by Fairview College. The Armed Forces saw mobility in the private sector as the benefit of certification for many of its personnel. To date, approximately 200 certificates have been granted to Armed Forces personnel.

Supporting labour mobility in Canada

- 93% of Alberta journeymen have an Interprovincial Standards Program (Red Seal) available to them. The “Red Seal” allows qualified trades persons to practice the trade in any province or territory in Canada where the trade is designated as a Red Seal trade. Alberta welcomes tradespeople from other provinces and territories with a Red Seal.
- During 1999-2000, the Board agreed with the recommendation of the Electrician PAC that the Industrial Electrician Red Seal, as well the Construction Electrician Program Red Seal be recognized in Alberta.

Support for the continuing development of other interprovincial standards

- A general framework is in place to discuss the development of standards. The Canadian Council of Directors of Apprenticeship (CCDA) invited Board chairs to attend and participate in the semi-annual CCDA meetings and in their sub-committees.

Supporting and encouraging the development of interprovincial common core curricula

- 1999-2000 marked the end of a pilot project for the carpenter trade to develop an Interprovincial Common Core Curriculum Standard (course outline), a progress book and an industry developed examination item bank for exams. The project was funded through a National Sectoral Adjustment Services initiative in cooperation with the Canadian Construction Association. The curriculum standard, contents of the record book and apprenticeship item bank are now complete. Next steps include a final report to Canadian Council of Directors of Apprenticeship (CCDA) members, evaluation of project, obtaining jurisdictional acceptance of the curriculum standard, a Progress Record Book, an item bank, and translation of project materials.

“All my co-workers told me it was impossible for me to get financial assistance. When I found out there was financial assistance available, I was very grateful.”

Apprentice electrician

Working with other training providers

- During 1998-1999, the Maintenance Platoon Control Office of Canadian Forces Base Edmonton had requested that the Department approve persons who reached a QL5 level through the Military Vehicle Technician training program as equivalent to Alberta's Automotive Service Technician or Heavy Equipment Technician programs. In 1999-2000, after an extensive review, the Automotive Service Technician PAC recognized the department of National Defence Qualification Level 3 and 5 Military Vehicle Technician training for the purpose of accreditation to the trades with the provision that certain shortfalls are met.

Ensuring affordability

- The Board continued to work with the Department to ensure that tuition fees are reasonable and that grants and loans are available to apprentices to attend technical training. 1999-2000 represented the end of the tuition fee transition period:
 - Tuition fees for 1999-2000 were \$50 per week of training with a minimum fee of \$200.
 - The Minister announced the previous year that tuition fees for apprentices would remain at the 1999-2000 rate until 2003.
 - Tuition fees will continue to be set by the department.
- During 1999-2000, the Board began considering a Registered Apprenticeship Program (RAP) Scholarship to recognize the excellence of high school students who have been RAP apprentices, graduated high school and continued in a regular apprenticeship program. The scholarship would seek to encourage early entry into apprenticeship programs, and encourage excellence. The concept would require the establishment of a large endowment fund generated from industry with annual support from government.

Staying receptive to innovations and changes in technology and industry training requirements

- The Board continues to work with industry, PACs, the Department and post-secondary institutions to incorporate the latest technological and other advances in trade curriculum and training methods. In early 1999-2000, the Department announced a \$5.7 million grant from the Access Fund to expand apprenticeship technical training spaces and equipment purchases at Alberta post-secondary institutions throughout the province. These grants provided 1787 temporary and 346 permanent spaces in 14 trades at 10 post-secondary institutions.

The Board continues to work with industry, PACs, the Department, and post-secondary institutions to incorporate the latest technological and other advances in trade curriculum and training methods.

CELEBRATING EXCELLENCE

An Albertan won a bronze medal at the internationally renowned World Skills Competition in Montreal. Three other Alberta competitors received Certificates of Merit.

- The Apprenticeship and Industry Training Board continues to celebrate the achievements of highly skilled apprentices, journeymen, students and employers across Alberta. 1999-2000 saw many apprentices recognized by the Board and other organizations. 1999-2000 was also a year of honour for the Board as well as for staff of the Apprenticeship and Industry Training division of Alberta Learning.
- The 1999 **Alberta Apprenticeship and Industry Training Board Awards**, held at the Provincial Museum of Alberta in Edmonton, honoured 50 Top Apprentices from across Alberta for their achievements in the final year of their apprenticeship program. Strong recommendations from employers accompanied by their first place marks led to their selection for these awards. The Employer Awards of Excellence were presented to Territorial Electric Ltd. (Edmonton) and Scott's Auto Service Ltd. (Calgary.) These employers demonstrated commitment to training apprentices, and to investing in Alberta's apprenticeship and industry training system
- Sponsored by **Skills Canada Alberta**, the 1999 Provincial Skills Competition at SAIT in Calgary hosted over 700 secondary, post-secondary and apprenticeship participants in 26 areas. Provincial winners were eligible to compete at the 1999 Canadian Skills Competition in Kitchener, Ontario. Alberta sent 52 competitors and won 8 medals.
- The 35th annual International Vocational Training Organization's (IVTO) **World Skills Competition** was held for the first time in Canada. Eight Albertans were among 600 competitors from 34 countries who gathered in Montreal November 11-14, 1999. Canada was awarded 3 medals and 11 certificates. A Red Deer apprentice won a bronze medal for commercial wiring (electrician). Four other Albertans received Certificates of Merit. Alberta had the second highest number of participants at the competitions. Alberta's competitors were honoured by both the Board and in the Alberta Legislature.
- The **Thygesen Scholarship Fund** awarded its second \$500 scholarship in February 2000 to a plumber and gasfitter - 2nd class apprentice. The Fund has been established by former Board Chairman Jake Thygesen with the aim of encouraging high-achieving apprentices to continue their training.
- 1999-2000 represented the second year that **Rutherford Scholarships** were awarded to students who pursue apprenticeships. Scholarships are based on marks received in Grades 10, 11 and 12 in Alberta with \$400, \$800 and \$1,300 awarded respectively. The maximum scholarship value is \$2,500.

KEY PERFORMANCE INDICATORS

The Board recognizes that all partners in the apprenticeship and industry training system must be accountable for the results of their activities.

- On May 14, 1999, Premier Klein announced that the Alberta Apprenticeship and Industry Training Board initiative *A Vision for the Future*, was a 1999 bronze recipient of a **Premier's Award of Excellence**. The Premier indicated that this initiative clearly demonstrated exceptional commitment to client service, business practices, and creating a supportive work environment.

The Board recognizes that all partners in the apprenticeship and industry training system - industry (employers and employees), the network of local and provincial apprenticeship committees and the Alberta Government - must be accountable for the results of their activities. In partnership with the Department, the Board has established and implemented several key performance indicators (KPIs).

The following indicators are consistent with KPIs developed for the learning system as a whole.

Employers' satisfaction with the Alberta apprenticeship and industry training system

This indicator measures employers' satisfaction with the Alberta apprenticeship and industry training system. The data was obtained through an employer survey undertaken in early 2000. A survey is conducted every two years to update this indicator.

- 97% of all employers were satisfied or very satisfied with the skills of their certified journeymen. 95% of 1998 employers were satisfied or very satisfied.
- Overall, 90% of all employers associated with the system were satisfied or very satisfied with the system. 86% of 1998 employers were satisfied or very satisfied.

Apprentices' satisfaction with their apprenticeship training

The apprentice satisfaction indicator reflects the percentage of all graduates from the Alberta apprenticeship and industry training system who were very satisfied or somewhat satisfied with the quality of their on-the-job work experience and technical training. A third survey is planned for 2001.

The apprentice satisfaction indicator also compares the opinions of journeymen who completed their training between August 1997 and July 1998 (1997-1998) to those who completed between August 1995 and July 1996 (1995-1996.) The 1995-1996 Graduates of Apprenticeship Satisfaction Survey used a three-point scale whereas the Survey of 1997-1998 Graduates of Apprenticeship Training used a four-point scale.

The most recent results were published in April 1999. Key findings are:

- 91% of 1997-1998 graduates were very or somewhat satisfied with the overall quality of their work experience. 97% of 1995-1996 graduates were fully or somewhat satisfied.
- 93% of 1997-1998 graduates were very or somewhat satisfied and 98% of 1995-1996 graduates were fully or somewhat satisfied with the overall quality of their technical training.
- Based on their experiences with apprenticeship training, 94% of the 1997-1998 graduates would still become an apprentice. 92% of the 1995-1996 graduates would make the same decision.

Yearly training completion ratio

This indicator shows the percentage of first year apprentices who complete that year and go on to complete the rest of their program (both technical training and work experience) within two years of their earliest possible completion date. “First year apprenticeship completers” is defined as those who have completed all their technical training and work experience requirements for the first year of their apprenticeship program. Based on 1998-1999 data provided by Alberta Learning, 75% of first year apprenticeship completers went on to complete the rest of their program within two years of their earliest possible completion date. In 1997-1998, and 1996-1997 this figure was 74% and 73%, respectively.

Responsiveness to the skill requirements of the Alberta economy

This indicator measures employers’ satisfaction and the ability of the apprenticeship training system to provide skilled trades people. The data was obtained through employer surveys conducted in 1998 and 2000.

- Overall, 85% of 2000 employers were satisfied or somewhat satisfied with the ability of the apprenticeship training as a method of providing skilled tradespeople. 82% of 1998 employers were satisfied or somewhat satisfied.

LOOKING TO THE FUTURE

In coming months and years, the Board will implement its strategic plan and continue activities that build on its vision, mission and goals, including:

- Implement new strategies to strengthen and support the industry advisory network.
- Promote lifelong learning among journeymen including greater exploration and development of the “train the trainer” concept.
- Further support for alternative forms of training and modularization of technical training.
- Continue to develop and implement recommendations arising from the industry consultations. Emphasis will be on making necessary amendments to the *Apprenticeship and Industry Training Act* and the Board’s review of regulations under the government’s regulatory review project.
- Continue to implement the strategic communications plan, including publishing **Update** newsletter.
- Encourage larger employers to train apprentices.
- Explore new ways to respond to needs of employers and employer groups
- Continue to produce and publish Key Performance Indicators.
- Working towards greater awareness of the labour mobility the Red Seal endorsement offers journeymen.

BIOGRAPHIES OF BOARD MEMBERS

Board Chairman

C. J. (Cliff) Williams

Mr. Williams is the Chairman of the Board. His term continues until December 31, 2000.

Mr. Williams holds trade certificates in the plumber and gasfitter trades. He has also completed numerous courses in estimating, project and materials management and critical path scheduling. After completing his apprenticeship he worked as a journeyman and a foreman until he founded Williams Plumbing & Heating Co. Ltd. in 1959. He was chief executive officer for 28 years.

In 1988, Mr. Williams joined Construction Labour Relations - an Alberta Association, as a Labour Relations Representative, an organization he had been instrumental in founding in 1970. While with the association, he held positions of director and chairman of the board and chairman of the Mechanical Trade Division of the Association. Mr. Williams retired from full time employment with CLR at the end of 1998.

Mr. Williams has participated in many other organizations. He was a member of and served on committees for the United Association of Journeymen and Apprentices of the Plumbers and Pipefitting Industry of the United States and Canada, Local 488. He has also served as chairman of the Provincial Division and the Edmonton District of the Mechanical Contractors Association of Alberta. He has been a member of the Alberta Labour Relations Board since 1983.

He is currently a trustee for two trust funds: Local 488 Edmonton Pipe Industry Health, Welfare and Pension Fund; and Local 8 Sheet Metal Workers Health and Welfare Trust Fund.

Representing employers in designated trades

Lawrence W. Bates

Mr. Bates' term on the Board continues until August 31, 2001.

Mr. Bates has 35 years of experience in the automotive industry. He is currently president of Stadium Nissan Inc., Calgary. He has worked for General Motors of Canada as a mechanical training instructor, district service manager and supervisor of customer services. He also worked for Jack Carter Chev Olds Cadillac in Calgary as service manager, lease department manager and new vehicles sales manager.

Mr. Bates is also a director of the Calgary Better Business Bureau, and a member of the Calgary Chamber of Commerce and the Rotary Club of Calgary. He is past director of the Motor Dealers Association of Alberta, past president of the Calgary Motor Dealers Association, and past chairman of the Nissan Canada Advisory Board, the Nissan Dealer Performance Group and of the Calgary International Auto and Truck Show.

William A. (Bill) Bussing

Mr. Bussing's term on the Board continues until December 31, 2001.

Mr. Bussing holds a bachelor's degree in electrical engineering and a master's degree in economics. He is a registered professional engineer and a member of the Association of Professional Engineers, Geologists and Geophysicists of Alberta (APEGGA). He has 30 years experience in the construction industry, mainly in electrical work, instrumentation and general construction. He is now general manager, electrical and automation services for Flint Canada Inc.

Mr. Bussing is active in several industry organizations including the Merit Contractors Association, Alberta Construction Association and the Construction Owners Association of Alberta. He is past president of the Edmonton chapter and former board member of the Electrical Contractors Association of Alberta.

Alexander (Alex) Munro

Mr. Munro's term on the Board continues until December 31, 2000.

Mr. Munro holds a trade certificate with an Interprovincial Red Seal in the millwright trade. He has over 30 years experience in the pulp, paper and wood products industry in British Columbia and Alberta. He is employed by Alberta-Pacific Forest Industries Inc. as mill services business group leader. Previous positions with the company include woodroom manager, engineering and maintenance manager, and technical services group leader.

Prior to joining Alberta-Pacific, he was employed by Millar-Western Industries Ltd. in Whitecourt as a millwright, sawmill manager, and maintenance and engineering manager.

Melvin (Mel) Raffard

Mr. Raffard's term on the Board continues until December 31, 2001.

Mr. Raffard holds a trade certificate in the power systems electrician trade. He is also a graduate of the Royal Canadian Electrical Mechanical Engineers school in Kingston, Ontario as both an electrical technician and an infrared technician. He has over 30 years experience in the electrical industry.

Mr. Raffard is employed as director of meter operations and engineering for EPCOR Technologies. He has served on the provincial apprenticeship committee for the power systems electrician trade as both an employer and employee representative. He is also a long-standing member of the Metering Section of the Canadian Electrical Association.

Representing employees in designated trades

Brent M. Bish

Mr. Bish's term on the Board continues until December 31, 2001.

Mr. Bish holds trade certificates in the heavy duty mechanic, partsman and crane and hoist operator trades as well as an occupational certificate in warehousing. He has over 20 years experience in the mining industry and works as a partsman at Cardinal River Coals Ltd., Hinton. He is also 1st vice president of the United Mine Workers of America, Local 1656 and treasurer of the Alberta Council for Sustainable Communities.

Mr. Bish has played an active role in initiatives such as the establishment of warehousing as a designated occupation.

Marsha Cowley

Mrs. Cowley's term on the Board continues until December 31, 2000.

Mrs. Cowley holds a trade certificate in the hairstylist trade in Alberta and Ontario, and the Alberta Achievement in Business Competencies seal.

Mrs. Cowley has worked in the hairstylist trade for 28 years. For over 17 years, she has worked at Headquarters Salon and Day Spa in Sherwood Park. Prior to that, she owned her own salon in Ontario. Mrs. Cowley has been active with apprenticeship and industry training for the past 16 years. She has been the Presiding Officer for both the PAC and a LAC for the hairstylist trade. Mrs. Cowley also has been involved in developing Interprovincial Red Seal standards for the hairstylist trade.

Donald (Don) Lezetc

Mr. Lezetc's term on the Board continues to December 31, 2000.

Mr. Lezetc holds trade certificates with an Interprovincial Red Seal in the welder and boilermaker trades, as well as Alberta "A" and "B" pressure welder certificates. For the past nine years, he has been the administrator for the Alberta Boilermaker Joint Apprenticeship and Training Trust Fund. Previously, he worked as the Training Fund's instructor of boilermaker and welder upgrading programs.

Mr. Lezetc has been a member of the International Brotherhood of Boilermakers for almost 40 years working as a welder, boilermaker and supervisor on construction and maintenance of electric power installations, refineries, pulp mills and fertilizer plants in Alberta, British Columbia and Saskatchewan. He has also been involved in the provincial and local apprenticeship committee system for 15 years.

Douglas Smith

Mr. Smith's term on the Board continues to December 31, 2001.

Mr. Smith holds trade certificates in the machinist and millwright trades and a certificate in engineering technology. He is employed at TransCanada Pipelines, where he is team leader in the facilities maintenance department. He worked in manufacturing and maintenance engineering in southern Africa, and as a machinist and general foreman for Acro Machine and Fabrication. He has also been an instructor for the mechanical engineering department of the Southern Alberta Institute of Technology, and has over 35 years of industry experience.

Representing employers in non-trades occupations

Brian G. Bickley

Mr. Bickley's term on the board continues until August 31, 2001.

Mr. Bickley holds certificates in industrial instrumentation, watchmaking and adult continuing education. Mr. Bickley has 30 years experience in industry. He is employed by Syncrude Canada Ltd. as industrial relations manager.

During his time with Syncrude, he has also been instrument supervisor, shutdown manager and maintenance manager. Before joining Syncrude, Mr. Bickley worked with the Steel Company of Canada and Texaco Canada Ltd.

Leonard J. Gabert

Mr. Gabert's term on the board continues until December 31, 2000.

Mr. Gabert has 25 years experience in the rural natural gas industry, where he has also played an instrumental role in establishing gas utility operator as a designated occupation. He is past secretary treasurer and current zone 5 director for the Federation of Alberta Gas Co-ops Ltd., which is a member-owned organization dedicated to providing technological and training support for the safe delivery of natural gas to 100,000 rural Alberta businesses and residences. Mr. Gabert also serves as director, Paintearth Gas Co-op Ltd.

Mr. Gabert owns a mixed farm in the Castor area and is actively involved in the agriculture industry.

Mr. Gabert also volunteers for various charitable organizations.

Representing employees in non-trades occupations

D. Craig Evans

Mr. Evans' term on the board continues until December 31, 2001.

Mr. Evans holds a partsman trade certificate. He has been employed for Waterous Detroit Diesel-Allison for 25 years, where he is currently a parts manager.

Mr. Evans has served as a committee member and Presiding Officer for both the Provincial Apprenticeship Committee and Local Apprenticeship Committee for the partsman trade.

Bob Genée

Mr. Genée's term on the board continues until December 31, 2000.

Mr. Genée holds a trade certificate with an Interprovincial Red Seal in the carpenter trade. He has worked in the construction industry for 22 years, of which 18 years was in the carpenter trade. For the past four years he has been a District Administrator for Coram Construction.

Mr. Genée is also certified as a Construction Safety Officer for the Alberta Construction Safety Association.

Note 1: For the purposes of this report, new apprentices registered in 1999 includes first time ever registrants, apprentices registered in a second or multiple trades, and re-instated apprentices.

Note 2: An initiative was undertaken in 1999-2000 to identify and assist apprentices' progress in their program. Inactive apprentices were reinstated or cancelled.

Totals - All Certificates	5,541	177	3,377	449	278

Note 1: 4,370 apprenticeship graduates (see table 2) completed all their technical training and on-the-job training requirements in 1999. However, 4,424 certificates were processed and issued to completing apprentices, since some of the certificates were issued to apprentices who had completed all their technical training and on-the-job requirements in the previous year.

Note 2: Alberta Equivalency Documents are issued to recognize a certificate or document as being equivalent to a trade certificate granted under the Alberta Apprenticeship and Industry Training Act when the skills and knowledge upon which that certificate or document is based have been deemed to be equivalent to those of an Alberta certified journeyman in that trade (i.e. individuals having completed an apprenticeship program in another country).

Note 3: Extended Interprovincial Red Seals are issued to individuals who achieved their journeyman status through a different route (e.g. Equivalency Program) than completing an Alberta apprenticeship program.

Note 4: Journeymen Qualification Certificates are issued to persons whose knowledge, skills and work experience meet industry established competencies in an Alberta designated trade.

* Does not include statistics for Tool and Die Maker. **Although program lengths vary from trade to trade, the majority of apprentices graduate from 4 and 3-year programs

Note 1,2,3: There is no data available for these trades prior to 1996.

CHART 3 Apprentices Registered in Alberta, 1949 to 1999*

CHART 4 Alberta Apprenticeship Technical Training Attendance, 1958 to 1999**

Source: Alberta Apprenticeship and Industry Training Division, Alberta Learning

* These graphs represent statistics covering calendar years (January to December)

** Approximately 16,000 apprentices are expected to attend technical training by the end of the 2000 school year (August 1, 1999 to July 31, 2000). This has been included for comparative purposes since colleges and technical training institutes report their data by school year.

* These statistics cover the calendar year from January 1 to December 31, 1999. Since a school year is from August 1 to July 31, the calendar year statistic may vary from the school year statistics.

Note 1: Blank cells indicate completion of the apprenticeship program at the end of the previous period of training.

Note 2: "N/A" indicates no technical training is required in the period indicated, according to the approved curriculum for that trade.

Note 3: As of 1995/96, the number of technical training levels in the Boilermaker trade increased from three to four by including an "Entry Level" of technical training in the first period of the program.

Note 4: Locksmith technical training was offered for the first time in the 1995/96 school year.

Note 5: Apprentices in this trade take their 1st and 2nd periods of technical training together with apprentices from the Electrical trade.

Note 6: Zeros indicate no classes were offered during the reporting period.

* These statistics cover the calendar year from January 1 to December 31, 1998. Since a school year is from August 1 to July 31 the following year, the calendar year statistics may vary from the school year statistic.

Note 1: The Delmar and Marvel schools train Hairstylists. The Hairstylist trade is a two-year apprenticeship program.

Note 2: BC Tilesetter Joint Conference Board offers Tilesetter training.

Note 3: Trans Alta Utilities is accredited to provide technical training for its Power Lineman apprentices.

Note 4: British Columbia Institute of Technology provides technical training for Sawfilers and Tilesetters.

Note 1: Alberta Learning provides additional assistance to persons with special needs.

Note 2: Alberta provides technical training for apprentices from other provinces and the territories where the trade is designated but they are unable to provide technical training due to small apprentice registration numbers. Alberta does not issue those persons a certificate.

Note 3: Alberta registers apprentices and provides technical training to persons in jurisdictions where no program exists. Alberta issues a certificate upon completion of the program.
