

IMPORTANT

Due to increasing concerns about the security of exams, Alberta Apprenticeship and Industry Training now supplies all exam candidates with a calculator.

Personal calculators are not permitted.
No exceptions will be made.

The calculator is a solar-powered Casio FX-260 scientific model as shown here. The FX-260 provides all the basic and scientific functions required for most trade exams. Instructions on the use of the various functions are provided below.

Calculator Use Instructions

Note: To switch from the number or symbol on a black button to the orange function above the button, press the **SHIFT** key.

- ◆ Basic e.g., 18 multiplied by 3.6

1 8 X 3 . 6 =

- ◆ Percent e.g., 7% of 96

9 6 X 7 **SHIFT** % =

- ◆ Fractions e.g., $\frac{2}{3} + \frac{1}{4}$

2 a^b/c 3 + 1 a^b/c 4 =

- ◆ Trigonometry e.g., sine of 35°

3 5 sin

- ◆ Square root e.g., root of 49

4 9 **SHIFT** $\sqrt{\quad}$

To clear the screen, press the **AC** key.
