June 2010

Honourable Doug Horner, Deputy Premier and Minister  
Advanced Education and Technology  
#324 Legislature Building  
10800 - 97 Avenue NW  
Edmonton, Alberta T5K 2B6

Dear Minister Horner:

I am pleased to provide you with the 18<sup>th</sup> annual report of the Alberta Apprenticeship and Industry Training Board. This report covers the Board's operations and achievements for the period April 1, 2009 to March 31, 2010. It also presents a statistical overview of the Alberta apprenticeship and industry training system.

Respectfully submitted,

Ray Massey  
Chair

# Message from the In-Coming Board Chair

The mission of the Alberta Apprenticeship and Industry Training Board is 'to establish and maintain high quality training and certification standards in the apprenticeship and industry training system, and to promote training in the designated trades and occupations'.

The Board is committed to helping build a skilled workforce to improve the long-run competitiveness of Alberta's economy.

As the new chair, I look forward to collaborating with the members of the board, the minister, industry, post-secondary institutions and the staff of Advanced Education and Technology to achieve the board's mission and to maintain Alberta's reputation for high-quality apprenticeship and industry training that supports the needs of Alberta's industry.

Sincerely,

A handwritten signature in black ink that reads "Ray Massey". The signature is written in a cursive, flowing style.

Ray Massey  
Chair

# Message from the Out-Going Board Chair

Throughout the 65 years of apprenticeship training in Alberta, we have seen changes that have made Alberta's industry-driven apprenticeship and industry training system respond, evolve and become stronger. So it's no surprise that in spite of the economic environment in 2009-2010, the apprenticeship and industry training system continued to respond and adapt to the needs of industry.

The Alberta Apprenticeship and Industry Training Board is committed to maintaining Alberta's reputation for a responsive training and certification system aligned with labour market demand. To this end, the board supports the department's work to ensure the integrity of Alberta's trade and occupational certification standards is maintained.

In the past year, the board reviewed applications for the designation of new and existing trades and occupations, and made recommendations to the Minister of Advanced Education and Technology. The board, on the recommendation of industry, updated training and certification standards to keep them current with workplace needs.

New board initiatives included a review of apprenticeship entrance requirements to ensure they are aligned with industry expectations, are consistent with other post-secondary entrance requirements, and provide reasonable assurance that an individual has the prerequisite skills and knowledge to be successful in technical training. The board approved a new framework, a 'guiding structure' to assist each provincial apprenticeship committee review and revise the entrance requirements specific to its trade.

In 2009-2010, the economic environment created challenges for some employers and their apprentices. Depending on the trade, sector of the industry or geographic area of the province, some employers were hiring apprentices and some were reducing their workforce. In response, the board supported strategies to assist employers retain apprentices and to assist apprentices to complete their apprenticeship program. Throughout the year, however, Alberta's apprenticeship and industry training system continued to experience the pressures of large numbers of registered apprentices.

The industry committee network is the foundation of Alberta's apprenticeship and industry training system. The board worked with the department to strengthen the connection between local and provincial apprenticeship committees, and to increase the capacity of committees to provide quality advice to each other and the board.

The board was pleased to be part of the 40<sup>th</sup> WorldSkills Competition in Calgary in September 2009. The WorldSkills Competition provided a tremendous learning

opportunity for the approximately 59,000 Alberta students who visited the site and were exposed to the brightest and best competitors in trades and technology skill areas. The board is pleased that WorldSkills Calgary 2009 created a legacy for the training of future skilled workers by distributing approximately \$16 million worth of equipment used during the competition to school jurisdictions and post-secondary institutions that train Alberta apprentices.

My term as board chair ends at the close of the fiscal year (March 2010). My involvement as a member of the board and more recently as its chair has given me insight and a deeper understanding of the contributions that apprenticeship and industry training makes to industry success and Alberta's prosperity.

I want to thank the minister, members of the board, industry, post-secondary institutions and the staff of Advanced Education and Technology for their support over the years.

I wish the board, its new chair and members success in working to achieve the board's vision and mission. I have every confidence that, working from its firm foundation, the board and system can meet the challenges in the future.

Sincerely,

A handwritten signature in black ink, reading "Brian Bickley".

Brian Bickley  
Chair

# Introduction

The Alberta Apprenticeship and Industry Training Board was established by the Government of Alberta to work with industry to set the standards and requirements for training and certification in programs under the *Apprenticeship and Industry Training Act*. It makes recommendations to the Minister of Advanced Education and Technology about the needs of Alberta's labour market for skilled and trained workers and the designation of trades and occupations. It is accountable to report on its performance and to operate within the bounds of its legislation.

As a public agency, the board's work is aligned with government direction. The focus of the Government of Alberta's Strategic Business Plan in 2009-2012 is ensuring that Alberta moves beyond the current economic downturn and builds a stronger Alberta into the future. Of importance to the board is the government's priority to build a skilled workforce to improve the ongoing sustainability of Alberta's economy.

The Ministry of Advanced Education and Technology, and the board, are linked to the following goals in the government's Strategic Business Plan:

Goal 1 – Alberta will have a prosperous economy

Goal 2 – Albertans will be well prepared for lifelong learning

The board developed a 2009-2012 business plan that aligns with the ministry's three-year business plan and the government's Strategic Business Plan. Through this alignment, the board, in partnership with industry and the ministry, worked toward building an innovative and prosperous province where Albertans in designated trades and occupations meet the needs of industry and society.

**Vision**      **Highly skilled and trained people in designated trades and occupations meeting the needs of industry and society.**

**Mission**    **To establish and maintain high quality training and certification standards in the apprenticeship and industry training system, and to promote training in the designated trades and occupations.**

## Principles

### Accessible

Individuals wishing to pursue a career in the designated trades and occupations have access to apprenticeship and industry training.

### Funded by All

Apprentices, trainees, employers, and government contribute to the financial cost of training.

### Industry-driven

Industry is responsible for setting the standards for training and certification, and for providing on-the-job training and work experience for apprentices and trainees.

### Supported by Government

Government, with advice from industry, has a role in regulating apprenticeship training and helping individuals to acquire the skills needed to work in designated trades and occupations.

### Collaborative

Apprenticeship and industry training is based on effective partnerships among stakeholders.

### Integrated

Apprenticeship and industry training are options within the advanced learning system and part of lifelong learning.

## Alberta Public Agencies Governance Act

In spring 2009, the Legislative Assembly of Alberta passed the *Alberta Public Agencies Governance Act*. The act is subject to proclamation, anticipated in the first half of 2010.

The *Alberta Public Agencies Governance Act* aims to promote good governance within the province's public agencies and provides the legislative framework for the implementation of the Public Agencies Governance Framework adopted by the government in January 2008. The act reflects the principle that agencies are responsible and accountable to a minister, who in turn is responsible for the agency's performance, and accountable to the public for that performance.

The board is a public agency and has worked throughout the year to ensure that it will be in compliance with the act when it comes into force. The board has a mandate and roles document, developed jointly by the board and the Minister. In 2009, the board developed and approved a code of conduct and ethics for its members. Both documents are available to the public on [www.tradesecrets.gov.ab.ca](http://www.tradesecrets.gov.ab.ca).

## The Alberta Apprenticeship and Industry Training System and the Alberta Apprenticeship and Industry Training Board

Alberta's apprenticeship and industry training system is an industry driven system that ensures a highly skilled, internationally competitive workforce in over 50 designated trades and occupations. Industry (employer and employee representatives) sets training and certification standards and provides direction to the system through an industry committee network and the Alberta Apprenticeship and Industry Training Board. The Government of Alberta provides the legislative framework and administrative support for the system. Employers provide the on-the-job training component of apprenticeship and occupational training programs. The technical institutes and colleges deliver the technical training component of apprenticeship programs and offer formal training in some designated occupations.

The board consists of 13 people, appointed by the Lieutenant Governor in Council, who

are knowledgeable about training in trades and occupations and the needs of the Alberta labour market for skilled and trained people. Eight of the members represent employers and employees in designated trades and four represent employers and employees in other industries. To ensure a balanced approach, employers and employees are represented in equal numbers.

The members of the board connect with industry in many ways. They take a leadership role with industry in the discussion of major issues that affect the apprenticeship and industry training system. Members of the board represent Alberta's apprenticeship and industry training system on organizations such as Skills Canada Alberta and as advisors to trades-related programs such as the Career and Technology Studies (CTS) program in the K-12 education system. Board members attend meetings of provincial apprenticeship committees and occupational committees to

act as liaison between the board and these industry committees, participate in high school career days, and speak at conferences and workshops.

The board chair represents Alberta's apprenticeship and industry training system as a member of the Interprovincial Alliance of Apprenticeship Board Chairs (IPA). The IPA is a member of the Canadian Apprenticeship Forum – Forum canadien sur l'apprentissage (CAF-FCA) an organization of stakeholders working to influence pan-Canadian apprenticeship strategies through research, discussion and collaboration with the apprenticeship community across the country. The board works with CAF-FCA to promote apprenticeship as an effective model for training and education, contributing to the development of a skilled, productive, inclusive and mobile workforce.

# Celebrating 65 years of Alberta's Apprenticeship and Industry Training System

The sixty-fifth anniversary of the original 'apprenticeship act' occurred during 2009-2010.

## Evolution of the apprenticeship and industry training system

Prior to 1976, there were three statutes (acts) in Alberta that dealt with the training and certification of skilled tradespersons. *The Apprenticeship Act* (1944) included provisions for an apprenticeship system that trained workers in trades designated for training. *The Tradesmen's Qualification Act* (1936) dealt with the certification of tradespeople in various trades and *The Welding Act* (1941) dealt with certification in the welder trade. Under these three acts were trades with familiar names such as electrician and plumber; trades with less familiar names, for example, internal combustion engine mechanic (today's heavy equipment technician); and trades such as radiotechnician that are no longer designated. In 1976, these acts were consolidated into the *Manpower Development Act*.

The beginning of Alberta's apprenticeship and industry training system was established by *The Apprenticeship Act*. It established the first apprenticeship board with five members and provided for the appointment of advisory committees that included employer and employee representatives. Government approved the actions of the board and committees, but industry (employers and employees) was very much involved in setting the requirements for apprenticeship training.

Under the *Manpower Development Act*, the involvement of employers and employees in the training and certification of skilled tradespersons was continued. This act established the Alberta Apprenticeship and Trade Certification Board and expanded its authority to include matters relating to

certification as well as apprenticeship training. It expanded the responsibilities of the advisory committees, and provided for equal representation from employers and employees.

The current *Apprenticeship and Industry Training Act* established the Alberta Apprenticeship and Industry Training Board and strengthened the role of industry in training and certification in designated trades and occupations. The membership of the board and committees was restructured to include only members of industry with equal representation from employers and employees.

Alberta's apprenticeship and industry training system continues to rely on its foundation of industry committees. Today, there are more than 800 employers and employees involved in a network of approximately 165 local and provincial apprenticeship committees and occupational committees.

Throughout the years the board has been given increased responsibility respecting the standards and requirements for apprenticeship training. Today, government provides the legislative framework and administrative support for the system, but it is industry that establishes training and certification standards and provides direction to the system through an industry network and the Alberta Apprenticeship and Industry Training Board.

## Technical training providers

Technical institutes and colleges are key participants in Alberta's apprenticeship and industry training system. The first institutes to deliver technical training to apprentices in Alberta were the Provincial Institute of Technology and Art in Calgary and the Canadian Vocational Training School (also located in Calgary) in 1945.

Today, 11 technical institutes and colleges in Alberta deliver technical training to apprentices each year. Not only do they deliver technical training in all trades in the 'traditional' format of 'block release', where the apprentice spends a block of time (generally 8 weeks per year) in classroom training, in some trades they also offer it in other formats. This includes competency-based apprenticeship training (CBAT), distance delivery, weekly apprenticeship training system (WATS) and mobile delivery, and on-site classes at workplaces.

## Designated occupations

Designated occupations were introduced in 1992 in response to industry's need for a non-compulsory training option. Originally focused on training, most designated occupations now provide for the recognition of established competencies. Participation in a designated occupation is voluntary and a certificate is not required for an individual to work in the occupation. Some designated occupations have formal training prescribed by the board; some offer certification based on industry assessment of acquired competencies; and others offer certification based on industry training and board examination.

## Endorsements and additional certification

In the late 1950s, the Interprovincial Standards Red Seal Program was created to provide greater mobility for skilled workers across Canada. The Program represents industry's recognition of an interprovincial standard of excellence for the skilled trades. Apprentices who complete their training and pass an interprovincial standards exam are able to obtain a red seal endorsement on their Alberta Journeyman Certificate. The first trades to be designated as red seal trades were automotive service technician, electrician, carpenter, plumber, and sheet metal worker. Today, nearly all 50 of Alberta's designated trades have red seal designation.

In 1997, the Achievement in Business Competencies (Blue Seal) Program was introduced to encourage and recognize the study of business by persons certified in a trade or occupation. Programs are brought to the board for recognition as approved training toward a Blue Seal.

*"Throughout the 65 years of apprenticeship training in Alberta, we have seen changes that have made us stronger and have allowed us to be a model for apprenticeship training systems around the world. As members of Alberta's apprenticeship and industry training system, we work hard to ensure its success and to promote the trades as first-choice career options for Albertans. The result is a credential that is greatly respected and provides a tremendous sense of pride for those who achieve it."*

*Brain Bickley, Out-going Board Chair, Alberta Apprenticeship and Industry Training Board*

Establishing and Maintaining High Quality  
Training and Certification Standards

The board's primary responsibility is to set the standards and requirements for training and certification in programs under the *Apprenticeship and Industry Training Act*. The board relies on a network of industry committees that includes local apprenticeship committees (LACs) and provincial apprenticeship committees (PACs) in the designated trades, occupational committees in the designated occupations, and others such as provisional committees that may be established before the designation of a new trade or occupation comes into effect. The role of these committees includes:

- recommending to the board
  - > the designation or re-designation of trades and occupations,
  - > the standards for the skills and competencies required for certification,
- developing technical training course outlines,
- monitoring changes and identifying the need for improvements in training, and
- recognizing related training and certification.

The primary focus of designated trades is the acquisition of skills and competencies through an apprenticeship program. Apprenticeship begins with finding an employer. Approximately 80 per cent of an apprentice's time is spent on the job under the guidance of a journeyperson. The other 20 per cent is spent on technical training provided at or through a post-secondary institute – usually a college or technical institute. The standards and requirements for technical training are recommended to the board by the provincial apprenticeship committees. The board is responsible for ensuring these standards meet the needs of apprentices and employers.

The primary focus of designated occupations is the recognition of acquired skills and competencies. The standards and requirements for certification are recommended to the board by the occupational committees. Some designated occupations have formal training provided by industry. The standards and requirements of this training are also recommended to the board by the occupational committees.

## Designating Trades and Occupations

While no trades or occupations were designated in 2009-2010, the board continued to review applications for designation. Trades are designated by the Lieutenant Governor in Council. Occupations are designated by the Minister of Advanced Education and Technology. The board finalized its review on the applications for the designation of electrologist and cathodic protection technician as designated occupations, and of railway car technician as a designated trade. The board's recommendations are under review by the Minister.

# Changing Trades and Occupations

The board, with the approval of the minister, makes changes to training and certification standards in trades and occupations. The board relies on industry committees, particularly provincial apprenticeship committees and occupational committees, to identify needs, recommend changes and provide a rationale. Provincial apprenticeship committees, with the assistance of their local apprenticeship committees, regularly review their course outlines and their training and certification standards to ensure that technical training keeps pace with changes in technology and the workplace. As well, occupational committees regularly review their competency profiles and training programs where they exist, to ensure the competencies and standards for their occupation are current.

In 2009-2010, the board, with the approval of the minister, made changes to the **trade regulations** for the auto body technician, electric motor systems technician, ironworker, millwright, lather-interior systems mechanic, and powerline technician trades. The board, with the approval of the minister, also made changes to the **occupation regulation** for the oil and gas transportation services occupation. These changes are the result of the ongoing review of regulations by the provincial apprenticeship committees and occupational committees.

As a result of recommendations from provincial apprenticeship committees, the board made changes to the **course outlines** of the auto body technician, bricklayer, cabinetmaker, hairstylist, instrument technician, sheet metal worker, and rig technician trades. These changes support the development and maintenance of course content and outcomes that are current and relevant to the workplace.

All trade and occupation regulations have expiry dates to make sure they are relevant and necessary. The board systematically evaluates each trade and occupation to make sure they are viable and sustainable, and reviews the trade or occupation regulations to ensure they continue to reflect the needs of industry. In 2009-2010, the expiry dates for eight trade regulations and three occupation regulations were extended.

## Changes to Trade and Occupation Regulations

**Ironworker** – The regulation to allow ironworkers who hold a certificate of completion of apprenticeship in the Ironworker Apprenticeship Certification Program issued by a Local Union Apprenticeship Program certified by the International Association of Bridge, Structural, Ornamental and Reinforcing Ironworkers in the United States of America to work in the ironworker branch of the ironworker trade was amended.

**Oil and Gas Transportation Services** – The swamper branch of the occupation was discontinued effective April 1, 2010.

**There were minor changes in the following trade regulations to improve clarity**

**Auto Body Technician** – The tasks, activities and functions were amended to better reflect the work of the trade.

**Electric Motor Systems Technician** – The undertakings and tasks, activities and functions were amended to better reflect the work of the trade.

**Lather-Interior Systems Mechanic** – The number of required, on-the-job training hours in second period to 1560 hours was reduced to be consistent with a revised course outline.

**Millwright** – The definition of 'millwright equipment and machinery' and the tasks, activities and functions were amended to clarify terminology and better reflect the work of the trade.

**Power Lineman** – References to the name of power lineman were changed to powerline technician.

## Changes to Course Outlines

**Auto Body Technician** – The course outline was revised to have closer integration with the National Occupational Analysis.

**Bricklayer** – The course outline was revised to allow for better exam development, and to make minor changes to content.

**Cabinetmaker** – The course outline was revised to reflect current industry practices, and put more emphasis on Computerized Numerically Controlled (CNC) machining.

**Hairstylist** – The course outline was revised to align the training to an apprentice's skills learned on the job and updated to reflect newer industry practices.

**Instrument Technician** – The course outline was revised to reflect current industry practices.

**Sheet Metal Worker** – The course outline was revised to make minor changes to content.

**Rig Technician** – The course outline was revised to make minor changes to content.

## Expiry Date Extensions

**Baker Trade Regulation**, extended until August 31, 2019.

**Communication Technician Trade Regulation**, extended until March 31, 2014.

**Concrete Finisher Trade Regulation**, extended until August 31, 2018.

**Gas Utility Operator Occupation Regulation**, extended until March 31, 2015.

**Oil and Gas Transportation Services Occupation Regulation**, extended until March 31, 2015.

**Outdoor Power Equipment Technician Trade Regulation**, extended until August 31, 2014.

**Painter and Decorator Trade Regulation**, extended until August 31, 2019.

**Rig Technician Trade Regulation**, extended until August 31, 2016.

**Sawfiler Trade Regulation**, extended until August 31, 2016.

**Tilesetter Trade Regulation**, extended until August 31, 2012.

**Well Testing Services Supervisor Occupation Regulation**, extended until March 31, 2015.

# Strengthening Apprenticeship Entrance Requirements

Appropriate standards for entrance to apprenticeship programs help maintain Alberta's high quality training and certification standards. In 2009-2010, the board reviewed the existing apprenticeship entrance requirements to ensure they are aligned with industry expectations, are consistent with other post-secondary entrance requirements and provide reasonable assurance that an individual has the prerequisite skills and knowledge to be successful in apprenticeship technical training. Based on research and stakeholder consultation, the board approved a new framework for apprenticeship entrance requirements. The framework is being used as a 'guiding structure' to review and revise, in consultation with the provincial apprenticeship committees, the entrance requirements specific to each trade.

## Entry Options

The framework consists of three entry options – a high school diploma, a mature learner option and entrance exams.

1. Apprentices who have been awarded a **high school diploma** often demonstrate the motivation, study skills and communication skills needed to succeed in both apprenticeship technical training and on-the-job training. The entry option is a high school diploma. Specific courses will be recommended.
2. **Mature learners** who do not have the academic prerequisites may have gained the knowledge, skills, attitude and motivation through life and work experience to be successful with apprenticeship on-the-job and technical training. The entry option is a specified age (to be determined) or older with prerequisite course work.
3. **Entrance exams** will continue to be an option for entry into apprenticeship. Consideration will also be given to alternate forms of assessment, for example, essential skills assessments.

## Principles

The framework for apprenticeship entrance requirements:

- aligns trade entrance requirements with industry, technical training providers and the secondary system expectations;
- enhances the perception of the trades by making entrance requirements consistent with other forms of post-secondary education;
- ensures that entrance requirements do not create unnecessary barriers;
- ensures that individuals have the prerequisite skills and knowledge to be successful in completing their apprenticeship program.

# Maintaining High Quality Standards

## Apprentice Satisfaction Survey Results

One measure of the effectiveness of the apprenticeship and industry training system is the survey of apprentice graduates conducted in alternate years. The graduate survey seeks to understand:

- graduate satisfaction with their experience in their apprenticeship training program and their technical training, and
- responsiveness of the apprenticeship and industry training system to the skill requirements of the Alberta economy – measured by the extent to which their employment is related to their training.

The majority of graduates who participated in the 2009 survey expressed satisfaction with:

- the overall quality of on-the-job-training (92%)
- the overall quality of technical training (94%) and
- their experience with the apprenticeship program – 98% would still have chosen to become an apprentice.

The board is accountable to the Minister of Advanced Education and Technology and to Albertans for the performance of the apprenticeship and industry training system. As part of this accountability, the board is committed to pursuing the highest level of performance.

To help the board measure the effectiveness of the system and to maintain high quality standards, the board supports projects that assist it to better understand the needs of apprentices and employers. In 2009-2010, the board supported the Apprentice Graduate Satisfaction Survey.

## Maintaining the Integrity of Alberta's Trade and Occupational Standards

To maintain the integrity and reputation of the system, the board continued to support compliance with the *Apprenticeship and Industry Training Act* and regulations. It is the role of the department staff to visit employer sites regularly to do a number of things, including: encourage employers to hire and train apprentices, encourage regular participation in technical training, advise employers of the requirements of the Act, and encourage compliance. In 2009, employers provided training to apprentices on approximately 15,000 employer sites and department staff contacted more than 11,000 employer sites.

Compliance issues are of particular concern when they affect the safety of the worker, a co-worker or the general public. In dealing with compliance issues, priorities for investigation are complaints related to contravention of the legislation in compulsory certification trades. Examples of these include unregistered apprentices, uncertified journeypersons in compulsory certification trades and non-compliance with the terms and conditions of an authorization to work.

## Supporting Compliance

Two approaches are used to require employers and workers to be compliant with the *Apprenticeship and Industry Training Act* and regulations:

1. enforcement through investigations of complaints, employer visits, inspections, compliance orders and court orders.
2. prosecution, in appropriate circumstances, where an offender is prosecuted for an offence under provisions of the Act and its regulations, or the *Criminal Code* (Canada).

## Apprentice Completion Rates

During the 2008-2009 school year, 77% of apprentices who completed the first year of their program went on to complete their apprenticeship within two years of the earliest completion date.

## Maintaining Integrity

Ways the department works to ensure the integrity of Alberta's trade and occupational standards is maintained include:

- prompt investigation of all complaints of possible examination compromises;
- audits and reviews of certification documents to ensure due diligence in granting certificates;
- working with employers and employer and employee associations to raise awareness of potential issues.

# Recognizing Work Experience, Training and Certification

## Helping Apprentices Attain Certification

In 2009-2010, the economic environment created challenges for some employers and their apprentices. Fewer employers were hiring apprentices due to the economic downturn. The impact of the slowdown depended on the trade, the particular sector of the industry, and the geographic area of the province.

The board supported strategies to assist employers to attract and retain apprentices, and to assist their apprentices complete their apprenticeships. Some of these strategies include:

- having sufficient technical training seats available in post secondary institutes. As part of Campus Alberta, apprenticeship technical training is offered at 11 public post-secondary institutions across Alberta. Because it is industry-led, apprenticeship programs have consistent and standard training course content across these institutions. This allows apprentices to take different periods of technical training at different institutions, if they desire.
- having information on available apprenticeship technical training seats readily accessible and updated daily, on [www.tradesecrets.gov.ab.ca](http://www.tradesecrets.gov.ab.ca).
- increasing the number of technical training seats available during the year, where warranted.
- allowing apprentices to take more than one period of technical training in a 12-month period (back-to-back training<sup>1</sup>).
- having self-study learning modules available in large enrolment trades. This allows apprentices to learn at their own pace and challenge the prior learning assessment (PLA) exam in some periods of their apprenticeship program.
- recognizing apprentices at the same level if they leave their apprenticeship program and then return.
- having a well-developed prior learning assessment process to provide advanced standing in an apprenticeship program to a person who has prior work experience or training in the trade.
- recognizing apprentices from other provinces and territories at the same level as in their home jurisdiction.
- recognizing (accrediting) programs to give advanced standing in apprenticeship.
- giving credit between different apprenticeship programs to encourage dual certification.
- encouraging apprentices to round out their experience, during downturns, by working in another sector of industry.
- having grants available to apprentices to assist them with the cost of attending technical training.
- having scholarships available to recognize excellence and encourage completion.

## Military Credentials Recognized in Civilian Workplace

The transition to civilian life is becoming easier for individuals with military credentials hoping to work in the trades in Alberta. A Certificate of Military Achievement, issued by the Department of National Defence (DND), is recognized by the board in the trades of automotive service technician, cook, carpenter, heavy equipment technician – heavy duty mechanic (off road), heavy equipment technician – truck and transport mechanic, millwright, refrigeration and air conditioning mechanic and parts technician – materials technician, plumber, machinist and welder were recognized in 2009-2010. Recognized certificates are posted on [www.tradesecrets.gov.ab.ca/certificates](http://www.tradesecrets.gov.ab.ca/certificates). Tradespeople transitioning to civilian life who wish to pursue the Interprovincial Standards Red Seal endorsement must write and pass the interprovincial standards exam.

## Interprovincial Standards Red Seal Program

The Interprovincial Standards Red Seal Program (Red Seal Program) was established more than 50 years ago to provide greater mobility across Canada for skilled workers. Through the program, apprentices who have completed their training and certified journeypersons are able to obtain a red seal endorsement on their trade certificate by successfully completing an interprovincial standards examination.

The strength of the Red Seal Program is common interprovincial occupational standards sustained by National Occupational Analyses that are developed by industry from across Canada. These standards are supported by Chapter Seven of the *Agreement on Internal Trade*.

The red seal endorsement is widely recognized and respected by industry as a standard of excellence. In certain work environments, it may provide a competitive hiring advantage. Some employers may require workers to have a red seal endorsement before they hire them.

Alberta participates in 47 of the 50 red seal trades. Most high-demand construction trades are designated red seal trades.

<sup>1</sup> 'Back-to-back' training refers to an apprentice attending one period of classroom training immediately followed by the next period of classroom training. Apprentices who participate may have delayed registering in school for a variety of reasons. This allows those who have met or exceeded the required number of on-the-job training and work experience hours to progress with their technical training.

## Labour Mobility Agreements

---

Alberta continues to comply with the British Columbia-Alberta *Trade, Investment and Labour Mobility Agreement* (TILMA) which eases the movement of goods, services, investment and workers between Alberta and British Columbia. It was fully implemented on April 1, 2009.

The TILMA requires individuals who are qualified or certified in an occupation in one province to be recognized by the other province as qualified to practice that occupation in that province without significant additional training, experience, examination or assessment of qualifications.

## Agreement on Internal Trade

---

The *Agreement on Internal Trade* is also intended to remove barriers and make the movement of goods, services, investment and workers between provinces and territories easier. A revised chapter seven, respecting labour mobility, came into effect in 2009-2010.

Chapter seven requires individuals who hold a certificate or license in a trade or occupation to be recognized by all other provinces and territories that issue a similar certificate or license without significant additional training, experience, examination or assessment of qualifications.

# Strengthening the Capacity of the Industry Committee Network

The industry committee network is the foundation of Alberta's apprenticeship and industry training system. The network includes the board and local and provincial apprenticeship committees, occupational committees, provisional committees, and ad hoc committees established by the board as needed. The board is responsible for establishing these committees and appointing their members. While some committees have legislated membership numbers, the board responds to the needs of industry by varying the size and industry representation as required in specific circumstances, within these limitations.

The members of the committees are the eyes and ears of industry at large. Effective communication with industry and within the network of industry committees is critical to the success of the apprenticeship and industry training system. The board relies on the information brought forward from various committees to make appropriate decisions and recommendations about training and certification that will meet industry's needs.

## Role of Local Apprenticeship Committees

Wherever there is activity in a trade, the board can set up a local apprenticeship committee. A local apprenticeship committee consists of a presiding officer and equal numbers of employees and employers. Local apprenticeship committees are the grassroots of the apprenticeship and industry training system. They stay in touch with local activities in their trade, providing local information to their trade's provincial apprenticeship committee.

Local apprenticeship committees make recommendations to the provincial apprenticeship committee about matters relating to apprenticeship and certification in their trade, for example recommendations about recognition of local training programs. They monitor apprenticeship programs and the progress of apprentices, and report to the provincial apprenticeship committee as required, for example, on the extent to which apprenticeship program content is meeting industry's skill requirements.

They also carry out any functions or duties assigned by the provincial apprenticeship committee or the board, for example, the provincial apprenticeship committee or the board may assign local apprenticeship committees to report on local economic and labour market conditions for the trade.

They make recommendations to the board about the appointment of members to their trade's provincial apprenticeship committee.

Local apprenticeship committees may engage in the resolution of disagreements between employees and their employers arising out of matters in their trade that come under the *Apprenticeship and Industry Training Act*. Presiding officers participate in a formal dispute resolution process outlined in regulation to resolve certain kinds of disputes between employers and their apprentices.

Committee members actively promote the apprenticeship and industry training system in Alberta, apprenticeship programs and training, and the pursuit of careers in their trade.

## Local and Provincial Apprenticeship Committees – Strengthening the Connection

A key strategy in the Board's 2009-2012 business plan recognizes the need to continue to strengthen the industry committee network. The board is working with the department to strengthen the connection between local apprenticeship committees and provincial apprenticeship committees, and to increase the capacity of committees to provide quality advice to each other and the board.

The connection is being strengthened, for example, by:

- including current and pending issues being considered by the provincial apprenticeship committee on the agenda of the local apprenticeship committee meeting;
- synchronizing committee meetings to ensure timely local apprenticeship committee input to provincial apprenticeship committee meetings;
- making provincial apprenticeship committee accountability more transparent to the network; and
- encouraging provincial apprenticeship committees to include the activities of their local apprenticeship committees in their reports to the board.

Strengthening the connection between local apprenticeship committees and provincial apprenticeship committees is intended to enhance knowledge and understanding of the apprenticeship and industry training system for all committees. This will lead to a stronger role for local apprenticeship committees in the industry network. Members will be contributors to the development of system standards. Other results include an increase in local apprenticeship committee member satisfaction as members feel their contributions are providing value to the system, and membership on committees is sought after by employers and employees.

## Training New Industry Committee Members

The board continued to strengthen the capacity of the industry committee network by providing orientation sessions for new provincial apprenticeship and occupational committee members. The orientation sessions familiarize new members with the structure and function of their committees and their roles and responsibilities as members. The information new committee members

gain through these orientation sessions helps them be more effective in reflecting industry's needs and providing advice and recommendations to the board about training and certification standards in their trade.

Developing orientation sessions for new local apprenticeship committee members is one of the initiatives that will be put into practice as

the connection between local apprenticeship committees and provincial apprenticeship committees is strengthened.

Nine orientation sessions for provincial apprenticeship and occupational committee members have been held since 2006-2007. The goal is to reach as many as 60 of the newest committee members each year by holding up to two orientation sessions annually.

# Structure and Organization of the Alberta Apprenticeship and Industry Training System

Feedback from participants on the orientation sessions for new provincial apprenticeship and occupational committee members:

"Very informative and to the point."  
 "All questions were answered on the spot."  
 "The session provided a good understanding of how LAC, PAC and Board work."  
 "Good layout of material."  
 "The session provided an opportunity to meet people from different trades."  
 "A very efficient presentation."  
 "The session was very open. I enjoyed it."

## The Industry Committee Network

Alberta's apprenticeship and industry training system relies on a network of approximately 165 committees made up of more than 800 individual industry representatives. Trade and occupational committees are composed of equal numbers of employers and employees.

## Promoting Training in the Trades and Occupations

Recognizing the shortage of skilled tradespeople and the demographic changes underway in Alberta, the board promotes the pursuit of careers and the training and certification of people in the designated trades and occupations.

The board and the ministry work with industry and organizations to encourage increased awareness, participation and success in the apprenticeship and industry training system. A number of programs to help youth and Aboriginal people, in particular, start their careers in the trades have been established.

The board also works to enhance the image of a career in the designated trades and occupations, promoting apprenticeship and occupational training as integral to the advanced learning system, and an excellent, post-secondary educational choice.

Scholarships play a role in attracting people to the designated trades and occupations and provide encouragement as apprentices and trainees progress through and complete their training. They enhance the profile of training and education in the trades and occupations by making it consistent with other post-secondary education choices for which there are scholarships. The board also recognizes the high achievements of apprentices as well as the efforts of industry, who are critical partners in producing highly skilled and trained tradespeople.

## Supporting Women in the Trades

The board fostered relationships with organizations that promote women in the trades, including Women Building Futures (WBF), a non-profit organization based in Edmonton that helps attract women into the construction trades, provides pre-trades training and mentorship for women entering or already in the trades.

The board also continued to support industry initiatives such as the Construction Owners Association of Alberta's (COAA) Opportunities for Women in Construction best practice development, and the COAA yearly best practices conference.

## Total Number of Women Apprentices Registered, 1996-2009

5,964 women apprentices were registered as of December 31, 2009.

Source: Alberta Advanced Education and Technology

\* This graph represent statistics covering calendar years (January to December).

# Attracting Youth to Careers in the Trades

*"How much I could learn outside the classroom, outside a textbook – not only the skills of an electrician but things like people skills – was very unexpected."*

Ariel Zezula  
RAP Apprentice  
Electrician Trade  
Medicine Hat

## Apprenticeship Facts

High school RAP students are employed at approximately 1,000 employer sites.

As of December 31, 2009, more than 3,300 apprentices who started RAP in high school were continuing in a regular apprenticeship program.

## Helping Students Find Their Place in the Trades

The board has hosted *Helping Students Find Their Place in the Trades* information sessions for school counsellors, off-campus education coordinators, students and parents throughout the province since 2001. The purpose of the sessions was to help these target audiences see a career in the trades as another quality post-secondary option, and to provide students with the same opportunity to access information about the trades as they would have with any other post-secondary education choice.

In 2009, the board requested a review of the target audiences for this project. It was determined that students and parents were well served by initiatives other than those of the board, for example the presentations made by the *Learning Clicks* Ambassadors with enhanced trades-related information, and the presentations made by CAREERS: The Next Generation. Since September 2009, *Learning Clicks* Ambassadors have delivered approximately 800 presentations reaching more than 17,000 students and 1,300 adults across the province.

In addition, the *Helping Students* team reached school counsellors and off-campus education coordinators by attending relevant teacher/educator conferences and by communicating with them via a quarterly electronic newsletter/magazine (e-zine). The review also indicated that more communication with employers is desirable, but the messaging and method needs further development.

## Registered Apprenticeship Program

More than 1,700 high school students participated in the Registered Apprenticeship Program (RAP) in 2009. RAP allows high school students to participate in an apprenticeship program while they are still attending school. RAP apprentices earn hours of on-the-job training and work experience as credit toward their apprenticeship program and their high school diploma, as well as an income.

## Youth Apprenticeship Project

The Youth Apprenticeship Project (YAP) helps students explore career options through integrated learning activities that include linking academic and applied learning. The pilot project offered in the communities of Lac La Biche, High Prairie and Wabasca/Demarais, continued to receive popular support as employers, parents, school staff, and students find the project very beneficial.

As of March 2010, more than 150 students in Grades 7, 8 and 9 were participating in the project. More than 375 students in Grades 7 to 12 have participated in YAP since the project's inception in September 2004. Approximately 45 students who had participated in YAP are expected to graduate from high school in June 2010.

The YAP pilot project that has been administered by Advanced Education and Technology will end in August 2010. It will be transitioned into Alberta Education's Career and Technology Studies (CTS) junior high/middle years program.

## Youth in Transition to Apprenticeship Project

This project is operating in Edmonton and Calgary to assist youth (ages 18 - 30) to become registered apprentices and assist them through to the completion of their apprenticeship programs. It has been successful in introducing people from underrepresented groups to apprenticeship programs.

As of March 2010, there were 100 apprentices participating in the project.

# Helping Aboriginal People Find Careers in the Trades

## Apprenticeship Preparation for Aboriginal People

Apprenticeship Preparation for Aboriginal People is an essential skills project developed to assist Aboriginal people who need to upgrade their academic and workplace skills to participate in apprenticeship programs. The project has an applied and hands-on learning curriculum that focuses on literacy, numeracy, science and work maintenance skills. Assistance is provided through practical academic lessons, continual personal support, tutoring, work experience, work place readiness and assistance with job acquisition and retention. More than 70 participants completed the project piloted in Lethbridge, Wetaskiwin, St. Paul and Lac La

Biche. A number of these graduates became registered apprentices. Other communities have expressed an interest in the project and are exploring their options.

## Alberta Aboriginal Apprenticeship Initiative

Since April 2008, the Aboriginal Apprenticeship Initiative project has been assisting Aboriginal people to enter and complete apprenticeship programs. Operational in Edmonton and Fort McMurray, the initiative assists First Nations, Métis and Inuit people to register as apprentices and supports them both on-the-job and in technical training. As of March 31, 2010,

more than 230 Aboriginal apprentices were registered, and 53 Aboriginal people were certified through the project.

## Apprenticeship Facts

As of December 31, 2009, more than 2,000 Aboriginal people were registered in Alberta as apprentices. (See Table 12 in the Appendices).

# Recognizing Excellence in the Trades and Occupations

Each year the board, with support of industry, recognizes exceptional individuals and companies who are participating in the apprenticeship and industry training system. Awards and scholarships reflect the board and industry's appreciation and play a role in attracting people to the trades and occupations.

## Alberta Apprenticeship and Industry Training Board Family of Scholarships

The board, in partnership with industry and the Government of Alberta, created the Alberta Apprenticeship and Industry Training Board Family of Scholarships. The board's Family of Scholarships includes:

- Alberta Apprenticeship and Industry Training Scholarships,
- Top Apprentice Scholarships,
- Pre-Apprentice Scholarships, and
- Registered Apprenticeship Program (RAP) Scholarships.

Scholarships of \$1,000 and \$1,500 are available annually. These scholarships are awarded to recognize excellence and encourage registered apprentices and trainees to complete their apprenticeship or occupational training programs.

A total of 737 scholarships valued at \$743,000 were awarded to apprentices in 2009-2010.

## RAP scholarships

This year, the board awarded 396 Registered Apprenticeship Program (RAP) scholarships of \$1,000 each to high school graduates throughout the province.<sup>2</sup> These scholarships recognize the academic and trades-related accomplishments of high school students registered in RAP and encourage them to continue their apprenticeship program after high school. On November 12, 2009, CAREERS: The Next Generation and the board co-hosted a celebration in Edmonton to honour recipients.

Since 2001, 2,037 RAP Scholarships have been awarded.

## Academic Achievement of Scholarship Recipients

Approximately 54 per cent of all RAP scholarship recipients have met academic requirements and are eligible to receive the Alexander Rutherford Scholarship.

Approximately 20 per cent of all applicants for an Alberta Apprenticeship and Industry Training Scholarship achieve an academic standing over 90 percent.

## Alberta Apprenticeship and Industry Training Scholarship Program

The Alberta Apprenticeship and Industry Training Scholarships are designed to recognize excellence of Alberta apprentices in a trade, and trainees in a designated occupation, and to encourage recipients to complete their apprenticeship or occupational training program. These scholarships were made possible through the support of more than 300 organizations, associations, individuals from industry and the Government of Alberta, and are awarded annually. Thanks to the generosity of industry in 2009-2010, an additional \$327,000 was contributed for new scholarships.

In 2009-2010, 320 apprentices were awarded an Alberta Apprenticeship and Industry Training Scholarship, valued at \$1,000 each. Apprentices from 40 trades received scholarships, including 41 women and 18 Aboriginal people. As well, nine Pre-Apprentice Scholarships of \$1,000 and 12 Top Apprentice Scholarships of \$1,500 were awarded.

In 2009-2010, the number of scholarships available to Alberta apprentices increased by more than 20 per cent. Over the last eight years, 1,703 Alberta Apprenticeship and Industry Training Scholarships have been awarded.

<sup>2</sup> See Appendices for list of recipients.

## Alberta Apprenticeship and Industry Training Board Awards

Each year the board recognizes apprentices, employers and instructors for their achievements in the designated trades and occupations. The 13<sup>th</sup> annual Alberta Apprenticeship and Industry Training Board Awards ceremony in March 2010 honoured 60 top apprentices, two top employers, a top employer of Aboriginal apprentices and two top instructors, all who are critical to the success of the apprenticeship and industry training system. The event also honoured two recipients of the prestigious Chairman's Award of Excellence.

### Total Apprentices Being Trained by Employer Site Size, 2005-2009\*

Source: Alberta Advanced Education and Technology

\*The size of a employer site is determined by the number of tradespeople

## Top Apprentice

The Top Apprentice Award recognizes Alberta apprentices in their final period of apprenticeship in each trade or branch of a trade who have the highest combined mark (institute theory, institute practical, industry theory and industry practical) and a strong recommendation from their employer.

### 2009 Recipients

60 apprentices were recognized.<sup>3</sup>

### Top Apprentice Awards

From left: Doug Horner, Minister of Advanced Education and Technology; James Gardner, Top Apprentice, Welder Trade; Brian Bickley, Chair, Alberta Apprenticeship and Industry Training Board.

<sup>3</sup> See Appendices for list of recipients.

## Chairman's Award of Excellence

The Chairman's Award of Excellence is a prestigious honour awarded to only a few individuals every second year who have demonstrated outstanding dedication and commitment to their trades and occupations and to the principles of apprenticeship and industry training through service in the industry committee network. In the past, the awards were presented at the Industry Network Workshop. This year, they were presented as part of the Annual Board Awards ceremony.

### 2009 Recipients

JudyLynn Archer  
President and Chief Executive Officer,  
Women Building Futures

Don Oborowsky  
Chief Executive Officer, Waiward Steel  
Fabricators Ltd.

### Chairman's Award of Excellence – 2009 Recipient

*From left:* Doug Horner, Minister of Advanced Education and Technology; JudyLynn Archer, President and Chief Executive Officer, Women Building Futures; Brian Bickley, Chair, Alberta Apprenticeship and Industry Training Board.

### Chairman's Award of Excellence – 2009 Recipient

*From left:* Doug Horner, Minister of Advanced Education and Technology; Don Oborowsky, Chief Executive Officer, Waiward Steel Fabricators Ltd.; Brian Bickley, Chair, Alberta Apprenticeship and Industry Training Board.

## Top Employer

The Top Employer Award celebrates the outstanding contributions that employers have made to apprentices and to apprenticeship training in Alberta. These employers have demonstrated a strong support of apprenticeship training, made efforts to increase the probability of an apprentice's success, and created an environment of excellence.

### 2009 Recipients

North Region: Nortrux Inc. of Grande Prairie  
South Region: DMT Mechanical Ltd. of Lethbridge

## Top Employer of Aboriginal Apprentices

The Top Employer of Aboriginal Apprentices Award celebrates the outstanding contributions that employers have made to Aboriginal apprentices and to Aboriginal apprenticeship training in Alberta. These employers have demonstrated a strong support of Aboriginal apprenticeship training, made efforts to increase the probability of their apprentices' success, and created an environment of excellence. The **2009 recipient** was Saddle Lake First Nations, Saddle Lake.

## Top Instructor

The Top Instructor Awards recognize an instructor's excellence in teaching, dedication to students and commitment to apprenticeship. Apprentices attending a college or technical institute may nominate an instructor who provides apprenticeship technical training.

### 2009 Recipients

North Region:  
Alind Dixit, Rig Technician Instructor  
Northern Alberta Institute of Technology

South Region:  
Les Hoyle, Auto Body Technician Instructor  
Southern Alberta Institute of Technology

# Supporting Skills Competitions

Skills competitions prepare young people for their careers by teaching them leadership, teamwork and problem-solving skills that will help them succeed. The board continues to support provincial, national and international competitions to promote the skilled trades as a first-choice career option for young Albertans. In these competitions, apprentices and students compete in Olympic-style practical challenges that demonstrate their technical and leadership skills and abilities in the areas of communications, construction, manufacturing, transportation and service trades and technologies.

Apprentices who win a gold medal at the provincial and national events and who are 22-years-old or younger in the year of competition are eligible to be part of Team Canada and compete against the world's best from other nations at the biennial WorldSkills Competition. WorldSkills promotes awareness worldwide of the importance of skilled trades and technology to the prosperity of a nation.

## Team Canada strikes Gold in Calgary

Canada hosted the 40<sup>th</sup> WorldSkills Competition in Calgary, Alberta (WorldSkills Calgary 2009) from September 1 – 7, 2009. The event included four days of competition, opening and closing ceremonies, a World Leaders' Forum and a Global Skills Village. More than 900 competitors from 50 member countries/regions took part in 45 trade and technology skills competitions.

One thousand skills-specific and trade-certified individuals donated their time and talents to individual competitions and more than 150,000 people visited the site.

Eight Albertans, including six apprentices, one certified journeyperson and one individual from the technology sector joined Team Canada to take on the world. After four days of competition, Team Canada received recognition for their outstanding performance, taking three Gold, three Silver and two Bronze Medals and 13 Medallions of Excellence.

WorldSkills Calgary 2009 increased the profile of Alberta to international visitors as a key destination to learn, work, live, innovate and visit. It provided a tremendous learning opportunity for the approximately 59,000 Alberta students who were exposed to the brightest and the best competitors in trades and technology skill areas. This exposure will encourage many of these students to pursue a career in skilled trades and technology occupations. It highlighted the employers who share their expertise and train Alberta's tradespeople, and celebrated the achievements of Alberta's young tradespeople who make valuable contributions to the growth of the province's skilled workforce.

Following the event, approximately \$16 million worth of equipment used during the competition was distributed to school jurisdictions and post-secondary institutions to enable them to train future skilled workers in trades and technology.

## Provincial Skills Competition

This past year the 17<sup>th</sup> Annual Provincial Skills Competition featured 600 competitors aged 15 to 22 in over 40 trade and technology events. Hosted by Skills Canada Alberta, the two-day event in Edmonton in May 2009 drew a province-wide audience to witness the display of exceptional skills by high school and post-secondary students.

Gold medal winners became part of Team Alberta and represented the province at the 2009 Canadian Skills Competition in Charlottetown, Prince Edward Island.

## Canadian Skills Competition

From May 20-23, 2009, Skills Canada Alberta's largest Team Alberta ever competed at the Canadian Skills Competition in Charlottetown, Prince Edward Island. Testing their skills against participants from across Canada in 35 trade and technology events, Team Alberta received 28 medals. Of those 28 medals, Alberta apprentices earned 9: 2 gold, 4 silver and 3 bronze.

The Canadian Skills Competition is Canada's largest national multi-trade and technology competition for Canadian apprentices and students. It helps raise awareness of the trades and technologies among students, parents and educators. The 15<sup>th</sup> annual Canadian Skills Competition will be held in Waterloo, Ontario in May 2010. As 2010 is also the qualification year for the 41<sup>st</sup> WorldSkills Competition in London, United Kingdom in 2011, winners at the national level will become members of Team Canada and represent Canada next year.

Participating in skills competitions is "...an amazing experience. [Skills competitions] give the public and future apprentices a chance to see what a trade is all about, and it gives us some friendly competition."

Craig Spady  
Journeyperson Electrician  
Red Deer, Alberta  
Recipient of a Medallion of Excellence (point scores over 500) at WorldSkills Calgary 2009

## Looking Forward

The global economy is slowly recovering from the recession. The Canadian and Alberta unemployment rates are gradually decreasing. It is anticipated that a stronger Canadian currency and relatively low natural gas prices will continue to shape Alberta's economic and fiscal environment; and that as the economy recovers, demand for Alberta's resources will increase.

The continued aging of the population is expected to lead to a significant decline in the overall labour force participation rate in the long term. In the shorter term, skill shortages that existed in Alberta before the recession

are expected to return as the economy recovers.

In the years ahead, the board will continue to work toward achieving its vision of highly skilled and trained people in designated trades and occupations meeting the needs of industry and society by focusing on specific initiatives to address its strategic priorities as identified in its 2010-2013 Business Plan. It will support initiatives to enhance and promote the Interprovincial Standards Red Seal Program. It will review apprenticeship programs and the Qualification Certificate Program to ensure they are best able to meet

the demand for skilled tradespeople now and in the future. It will encourage the accessibility of technical training, and the participation and progress of under-represented individuals in apprenticeship and industry training programs.

The Board looks forward to working with its partners to meet its mandate of establishing and maintaining high quality training and certification standards in apprenticeship and industry training and promoting training in the designated trades and occupations.

## Appendices

# Apprenticeship at a Glance

- Alberta has 50 designated trades and nine designated occupations.
- Apprenticeship programs in most of the designated trades are three to four years in length.
- Approximately 80 per cent of an apprentice's time is spent on the job under the guidance of a certified journeyperson or qualified tradesperson. The other 20 per cent involves technical training provided at, or through, a post-secondary establishment – usually a college or technical institute.
- Apprenticeship begins with finding an employer. Employers hire apprentices, pay their wages and provide on-the-job training supervised by a certified or qualified tradesperson.
- Most apprentices are eligible for employment insurance while attending technical training. Apprentices who demonstrate financial need may qualify for a grant while attending technical training.
- The most common age for Alberta apprentices to register in their first trade is 19.
- While in high school, students can become apprentices through the Registered Apprenticeship Program (RAP). In RAP, they obtain hours of on-the-job training and work experience as credit toward both an apprenticeship program and a high school diploma while earning an income.
- To date, approximately \$3.7 million has been awarded to Alberta apprentices through the Alberta Apprenticeship and Industry Training Board Family of Scholarships.
- Alberta's apprenticeship and industry training system relies on a network of approximately 165 committees made up of more than 800 individual industry representatives. Trade and occupational committees are composed of equal numbers of employers and employees.
- Technical training is often delivered through what is called 'block release', where the apprentice spends a block of time, generally eight weeks per year in classroom training. Technical training is offered in other formats in some trades, including competency-based apprenticeship training (CBAT), distance delivery, weekly apprenticeship training system (WATS) and mobile delivery, and on-site classes at workplaces.
- Although Alberta has only 10 per cent of Canada's labour force, it trains more than 20 per cent of the country's apprentices.
- Alberta recognizes apprentices from other jurisdictions at the same level as their home jurisdiction.
- Alberta welcomes tradespeople from other jurisdictions who hold an Interprovincial Standards Red Seal.
- Alberta has produced more tradespeople with an Interprovincial Standards Red Seal than any other jurisdiction in Canada.

# Statistics at a Glance – 2009

- As of December 31, 2009, there were 69,904 registered apprentices in Alberta.
- Apprenticeship registrations have increased by 131 per cent since 1998, and 73 per cent in the last five years.
- In 2009, 16,594 new apprentices registered. Between 2004 and 2009, the average number of new apprentices registered was 19,420.
- As of December 31, 2009, more than 2,100 Aboriginal people were registered in Alberta as apprentices.
- More than 1,700 high school students were registered in RAP in 2009.
- High school RAP students are employed at approximately 1,000 employer sites.
- More than 3,300 apprentices who started RAP in high school are currently continuing in a regular apprenticeship program.
- In 2009, apprentices were being trained at approximately 15,000 employer sites around Alberta.
- In the 2009/2010 school year, there are more than 1,400 apprenticeship technical training classes being offered.
- In 2009, 8,876 individuals were certified in Alberta's 50 designated trades and nine designated occupations.
- 48,857 individuals were certified between 2004 and 2009.
- The majority of graduates who participated in the 2009 apprenticeship graduate survey expressed satisfaction with:
  - > the overall quality of on-the-job training (92%);
  - > the overall quality of their technical training (94%); and
  - > their experience with the apprenticeship program – 98 per cent would still have chosen to become an apprentice.
- According to a 2008 survey of employers, overall satisfaction with Alberta's apprenticeship and trade certification system remains high with 90 per cent of respondents expressing satisfaction with the system.
- The majority of employers who participated in the 2008 employer survey expressed satisfaction with:
  - > the skills of certified journeypersons (95%)
  - > apprenticeship technical training (86%)
  - > the effectiveness of on-the-job training (96%)
- Advanced Education and Technology staff completed more than 11,000 shop registrations through site visits in 2009. These site visits provide an opportunity to promote apprenticeship and industry training programs, to work with employers and apprentices to ensure the successful completion of apprenticeship training, and to ensure compliance with the *Apprenticeship and Industry Training Act*.

# About the Board

## Board Membership

The Board consists of:

- a chair
- four members representing employers in designated trades
- four members representing employees in designated trades
- two members representing employers in non-trade occupations
- two members representing employees in non-trade occupations

## Standing Committees of the Board

The Board has five standing committees through which it works:

### Labour Market Issues and Board Operations Committee

Monitors labour market activity, identifies industry-related training needs and opportunities, and addresses promotional and operational activities of the board.

### Industry Standards Committee

Formulates training and certification policy and standards to meet emerging requirements of the apprenticeship and industry training system.

### Industry Network Committee

Monitors the operations of the industry committee network and reviews nominations for membership in the provincial apprenticeship committees (PACs), local apprenticeship committees (LACs), occupational committees and provisional committees.

### Nominations Review Committee

Reviews applications and provides recommendations to the Minister of Advanced Education and Technology regarding the appointment of board members, along with Alberta Advanced Education and Technology staff.

### Awards and Scholarships Committee

Selects and recognizes award and scholarship recipients, and promotes the value and availability of awards and scholarships.

# About the System

## Industry-Driven

Alberta's apprenticeship and industry training system is an industry-driven system that ensures a highly skilled, internationally competitive workforce in more than 50 designated trades and occupations. This workforce supports the economic progress of Alberta and its competitive role in the global market.

Industry (employers and employees) establishes training and certification standards and provides direction to the system through an industry committee network and the Alberta Apprenticeship and Industry Training Board. The Alberta government provides the legislative framework and administrative support for the apprenticeship and industry training system.

Through the combined efforts of industry, government and the training institutions, Alberta's apprenticeship and industry training system is able to respond to the labour market and contribute to developing a highly skilled workforce that is competitive nationally and internationally. This collaboration helps to ensure that the apprenticeship and industry training system is timely, up-to-date and responsive to the needs of industry and the economy.

## Role of Industry

### Board

The board's primary responsibility is to establish the standards and requirements for training and certification in programs under the *Apprenticeship and Industry Training Act*. The board also makes recommendations to the Minister of Advanced Education and Technology about the needs of Alberta's labour market for skilled and trained workers, and the designation of trades and occupations.

### Industry Committee Network

Alberta's apprenticeship and industry training system relies on a network of industry committees. These include local and provincial apprenticeship committees in the designated trades, occupational committees in the designated occupations, and others. All trade committees are composed of equal numbers of employers and employees. The industry committee network is the foundation of Alberta's apprenticeship and industry training system. The role of these committees includes:

- recommending to the board the standards for the skills and competencies required for certification,
- establishing technical training course outlines,
- monitoring changes and identifying the need for improvements in training,
- recognizing related training and certification, and
- making recommendations to the board about the designation or re-designation of trades and occupations.

### Employers

Individual employers support the apprenticeship and industry training system by employing and training apprentices, providing them with an opportunity to develop their skills on the job. They also support the system by contributing equipment and other resources for technical training.

## Role of Post-Secondary Institutions

Technical institutes and colleges are key participants in Alberta's apprenticeship and industry training system. They work with Alberta Advanced Education and Technology, the board, and industry committees to enhance access and responsiveness to industry needs through the delivery of the technical training component of apprenticeship programs. They develop lesson plans from the course outlines established by industry and provide technical training to apprentices.

## Role of Government

Alberta Advanced Education and Technology works with industry, employer and employee organizations and technical training providers to:

- facilitate the development and maintenance of industry training and certification standards,
- provide registration and counselling services to apprentices and employers,
- coordinate technical training in collaboration with training providers, and
- certify apprentices and others who meet industry standards.

# Board Member Profiles

## Board Chair

### G. Brian Bickley

Brian Bickley has served as board chair since January 2004. He holds certificates in electronics, industrial instrumentation, watch making and adult continuing education. He has more than 45 years experience in industry, and is retired from Syncrude Canada Ltd. where he held the position as Industrial Relations Manager.

During his time with Syncrude, Brian was an instrument supervisor, shutdown manager and maintenance manager. Before joining Syncrude, he worked with the Steel Company of Canada and Texaco Canada Ltd. Brian previously served as a member on the Alberta Apprenticeship and Industry Training Board from September 1995 to November 2001.

## Board Members

Representing employers in designated trades

### Herman Bruin

Herman Bruin has served as a board member since January 2008. He holds trade certificates with an Interprovincial Standards Red Seal endorsement in the steamfitter-pipefitter and plumber trades, and a gasfitter trade certificate. He is the owner/operator of Bruin's Plumbing & Heating Ltd. and currently employs approximately 150 individuals in the plumbing, gasfitting, sheet metal, and refrigeration and air conditioning trades. Herman was a member of the provincial apprenticeship committee for the plumber trade and is a strong supporter of Alberta's apprenticeship and industry training system.

Herman is a member of the Students Finance Board and a volunteer representative of the Alberta Construction and Safety Association. He also has extensive service in support of the construction industry including terms as president of the Red Deer Construction Association, chairman of the Alberta Construction Association, and two terms as chairman of the Alberta Construction Safety Association. Herman was also member of the Board of Directors of the Workers Compensation Board and member of the Safety Codes Council.

Alberta's Venture Magazine recently recognized Herman as one of Alberta's 50 most influential people.

### Don Bunch

Don Bunch has served as a board member since January 2004. He holds a trade certificate with an Interprovincial Standards Red Seal endorsement in the welder trade.

He obtained his apprenticeship training with Wel-Can Welding Ltd. in Red Deer. In 1981, he formed Bunch Welding Limited and has been owner and president of the company for more than 25 years, regularly employing more than 250 certified tradespeople and apprentices.

Don participated in Alberta apprenticeship committees, both local and provincial, and served as presiding officer of the welder trade. He was also an active member of the Apprenticeship Scholarship Fundraising Committee, and is very active in high school career days and promotes the RAP Program.

Don is an active member of the Keyera Competency Management and Development system promoting lifelong learning and career pathways.

# Board Member Profiles

**Paul Heyens**

Paul Heyens has served as a board member since January 2008. He holds a trade certificate with an Interprovincial Standards Red Seal endorsement in the glazier trade. Since 1994, Paul has been the CEO and co-owner of the Alberta Glass Company Inc. in which approximately 70 of the 100 employees are certified tradespeople and apprentices.

Paul has served as both presiding officer and member of the Glazier Provincial Apprenticeship Committee.

Paul is currently chairman of the Merit Contractors Association of Alberta, chairman of Taiga Bioactives, and past president of the Provincial Glaziers Association of Alberta. He is a member of the Calgary, Alberta and Canadian construction associations, the Alberta Building Envelope Council, and various other industry associations. Paul has served on other business boards and acted as board chair for an independent Christian school for eight years. He has volunteer experience locally and internationally.

The Alberta Glass Company Inc. was awarded the Employer Award of Excellence in 2005 by the Alberta Apprenticeship and Industry Training Board, and has twice received the Merit Contractors Award of Excellence for Excellence in Human Resources Management.

**Allen (Al) Petersen**

Al Petersen has served as a board member since June 2007. He is president and owner of Petersen Buick GMC (ALTA) Inc. (Sherwood Park) where 36 of the approximately 110 employees are certified tradespeople and apprentices.

Al is a past president for the Edmonton Motor Dealers Association and has held many positions on General Motors boards.

Al is currently the Honorary Chair of Strathcona County's Canadian Cancer Society *Relay for Life* and is a Trustee on the board of Booth University College in Winnipeg. He has held the position of president on both the Sherwood Park and District Chamber of Commerce and Alberta Chamber of Commerce. He is also heavily involved with both the Salvation Army and Rotary Club and many other local charitable initiatives.

Al received the Motor Dealers Association *Dealer of Excellence* award for 2008.

## Representing employees in designated trades

**T. R. (Terry) Burton**

Terry Burton has served as a board member since April 2009. He holds a Bachelor of Commerce degree in Personnel and Industrial Relations from Memorial University in Newfoundland.

Terry has more than 30 years experience in business and industry. He currently holds the position of manager of Construction Labour Resources for Shell Canada Energy. Prior to joining Shell, Terry was corporate manager of Labour relations with Jacobs Catalytic Ltd. (Jacobs) where he was responsible for collective bargaining and associated aspects of labour relations, as well as the implementation and administration of various components of Jacobs' apprenticeship program.

Terry is co-chair of the Construction Owners' Association Workforce Development Committee where he has been involved in the development of programs and tools such as the Apprentice Mentoring Program and the Apprentice Best Practice booklet. Terry is a strong proponent of apprenticeship training, participating on various industry bodies and being involved with many trades-related organizations to foster apprenticeship advancement and employment. He has also participated in successfully raising funds for apprenticeship scholarships.

**John (Jack) Lane**

Jack Lane has served as a board member since April 2008. He holds a trade certificate with an Interprovincial Standards Red Seal endorsement in the crane and hoisting equipment operator trade. He currently holds the position of Maintenance Training Representative with Syncrude Canada Ltd., where he has been employed for the past 23 years in various positions.

Jack has been involved in apprenticeship and industry training in various capacities for a number of years. He served as the presiding officer of both the local and provincial apprenticeship committees and served on the National Occupational Analysis (NOA) Committee for the crane and hoisting equipment operator trade. He was also involved in the development of test questions for the trade exam, and is a member of the Canadian Standards Association Technical Sub-Committee for mobile cranes.

Jack spent 10 years racing sled-dogs in mid-distance races and now enjoys cycling.

**Jeffrey T. Norris**

Jeffrey Norris has served as a board member since January 2004. He holds trade certificates with an Interprovincial Standards Red Seal endorsement in the welder and ironworker trades. He has been involved with the provincial apprenticeship committee for the ironworker trade and is an active supporter of apprenticeship and industry training initiatives.

Jeffrey has been a member of the International Association of Bridge, Structural, Ornamental and Reinforcing Ironworkers, Local Union 720 for more than 23 years working as a welder, ironworker and supervisor on construction and maintenance projects in the commercial and industrial sectors in Alberta. He is currently employed as the coordinator/training instructor for the Alberta Ironworkers Apprenticeship and Training Plan.

# Board Member Profiles

**Silvana Poplawski**

Silvana Poplawski has served as a board member since February 2005. She holds a trade certificate with an Interprovincial Standards Red Seal endorsement in the hairstylist trade.

Silvana has been working in the hairstylist trade for 23 years, and is currently employed with Bell Avanti Hair in Edmonton. Before becoming a board member, Silvana was active in apprenticeship and industry training for 16 years. She was a member on both the local and provincial apprenticeship committees for the hairstylist trade and the presiding officer for the provincial apprenticeship committee. Silvana was a trade examiner and was involved in development of the provincial course outline and the National Occupational Analysis for the hairstylist trade. She is currently a member of the Board of Directors for Skills Canada Alberta. Silvana is also a community and elementary school volunteer.

Representing employers in non-trades occupations

**Brian Hinton**

Brian Hinton has served as a board member since January 2008. He holds a London City and Guilds Full Technology Certificate in Baking and National Diploma in Baking from the School of Baking at the Cambridge Institute of Technology and School of Arts, England. He also obtained a Diploma in Management from Manchester Polytechnic and London Polytechnic, and is a Fellow of the Institute of British Bakers.

Brian is the research and development director of Sweet Results Bakery and founder of Lakeview Bakery in Calgary.

Brian has participated on both the local and provincial apprenticeship committees for the baker trade spanning 15 years. His participation includes serving as the presiding officer on the local apprenticeship committee for three terms (nine years). While on the committees, Brian helped develop course material and test questions for the trade exam. He also served on the National Occupational Analysis (NOA) Committee for Baker Trade.

Brian has served on the Advisory Board for the Baking program, on the team that detailed the DACUM chart for the baker trade, and as an instructor at SAIT.

**H. A. (Hal) Williams**

Hal Williams has served as a board member since January 2004. He holds a Bachelor of Science degree in mechanical engineering from the University of Alberta and is a registered professional engineer in Alberta.

Hal currently holds the position of vice president - operations with KBR Canada. He has also held positions with Jacobs Industrial Services Ltd. and Lockerbie and Hole Inc. He has more than 30 years experience in the northern Alberta heavy industrial construction marketplace.

Hal has been involved with many industrial and community organizations. He is past chair of the Fabricators Council of the Tube and Pipe Association, and vice president of the Millwoods Cultural Recreational Facilities Association.

## Representing employees in non-trades occupations

**Gerald Clark**

Gerald Clark has served as a board member since February 2005. He holds a trade certificate with an Interprovincial Standards Red Seal endorsement in the electrician trade. Employed by Clark Builders, Gerald has worked in the electrical construction sector throughout western and northern Canada, Russia and China for 15 years. He has been manager of Human Resources for Clark Builders' field staff for more than ten years.

Gerald has been a certified Construction Safety Officer with Alberta Construction Safety Association, and was employed as a Safety Manager with Clark Builders prior to his current position.

**Ray Jeffery**

Ray Jeffery has served as a board member since February 2005. He holds trade certificates in the heavy equipment technician, automotive service technician and parts technician trades. He is currently a consultant with his own training company. Ray was previously employed with Finning (Canada) where he was responsible for learning and development.

Ray has served as presiding officer and member of both the provincial and local apprenticeship committees for the heavy equipment technician trade, and has been active for the last 31 years on various related industry and institute committees.

In 2001, Ray was awarded the Chairman's Award of Excellence by the Alberta Apprenticeship and Industry Training Board in recognition of his outstanding commitment to his trades and to the principles of apprenticeship through many years of service in the industry network.

# Statistical Profiles

**Note:**

As of 2001, the statistical tables and charts were changed to reflect the actual number of *people* involved in the Alberta apprenticeship and industry training system. In previous years, the data reflected the number of registrations, graduations and certificates issued rather than the number of apprentices registered and the number of certified individuals. The distinction is important. The first reflects the paper processed in a given period of time and the other reflects the number of people involved.

In the past, these numbers differed minimally. With the creation of various branches of individual trades and with the availability of multiple certifications within one trade, these numbers are increasingly divergent.

Please note that in 2003 the technical training information was also changed to reflect the *school year*. Prior to 2003, technical training attendance was provided based on the *calendar year* for consistency with other calendar year data (e.g. registrations). The switch to school year data provides a more accurate reading of the technical training data.

As a result of these changes, the data provided in the tables and charts that follow will not correspond to the data provided in Alberta Apprenticeship and Industry Training Annual Reports prior to the changes.

Source: *Alberta Advanced Education and Technology* and *Alberta Employment and Immigration*

Total Apprentices Registered: Total number registered as of December 31, 2009. Apprentices may be registered in more than one trade or branch of a trade within the same year but are counted here only once.

New Apprentices Registered: All apprentices registering during a single calendar year. The number includes those who are returning to do an additional apprenticeship after completing one or more apprenticeships in previous years, or continuing an apprenticeship in another trade for which they registered in a previous year. Apprentices who registered in more than one trade or branch of a trade within a specific year, or who changed from one branch of a trade to another branch within the same trade on the same day, are counted only once. The number does not include reinstated apprentices (unless reinstated in the same year).

\* Total number of apprentices registered as of December 31 each year. Apprentices may be registered in more than one trade or branch of a trade within the same year but are counted here only once.

N/A = Not Applicable. Data does not exist in one or more of the specified years.

Note 1: The designation of the trade of electronic technician was rescinded effective September 1, 2007. Effective September 1, 2005, contracts of apprenticeship were no longer accepted for registration.

Note 2: Rig technician became a designated trade on June 1, 2005 and was phased in over three years. 1,428 of the rig technician apprentices are from Canadian jurisdictions other than Alberta.

N/A = Not Applicable. Data does not exist in one or more of the specified years.

\* New apprentices include all apprentices registering during a single calendar year. The number includes those who are returning to do an additional apprenticeship after completing one or more apprenticeship programs in previous years, or continuing an apprenticeship in another trade for which they registered in a previous year. Apprentices who registered in more than one trade or branch of a trade within 2009, are counted here only once. The number does not include reinstated apprentices (unless reinstated in the same year).

Note 1: The designation of the trade of electronic technician was rescinded effective September 1, 2007. Effective September 1, 2005, contracts of apprenticeship were no longer accepted for registration.

Note 2: Rig technician became a designated trade on June 1, 2005, and was phased in over three years. Approximately 271 of the newly registered rig technician apprentices are from Canadian jurisdictions other than Alberta.

Table 4

## Total and New Apprentices Registered by Branch, 2009

	Total Registered Apprentices	New Apprentices Registered		Total Registered Apprentices	New Apprentices Registered
Appliance Service Technician

Source: Alberta Advanced Education and Technology

Note 1: Apprentices registered in a single branch of the auto body technician trade are counted under the branch in which they are registered. Apprentices registered in two or three branches of the trade are counted under the 'Technician' heading.

Note 2: The parts technician trade merged with the warehousing occupation on May 1, 2008. The parts technician trade now has two branches - parts technician and materials technician. Apprentices who completed or were granted credit for first period technical training by June 30, 2008 could continue in the old parts technician program.

Chart 1

## Total Number of Apprentices Registered by Year, 1989 - 2009

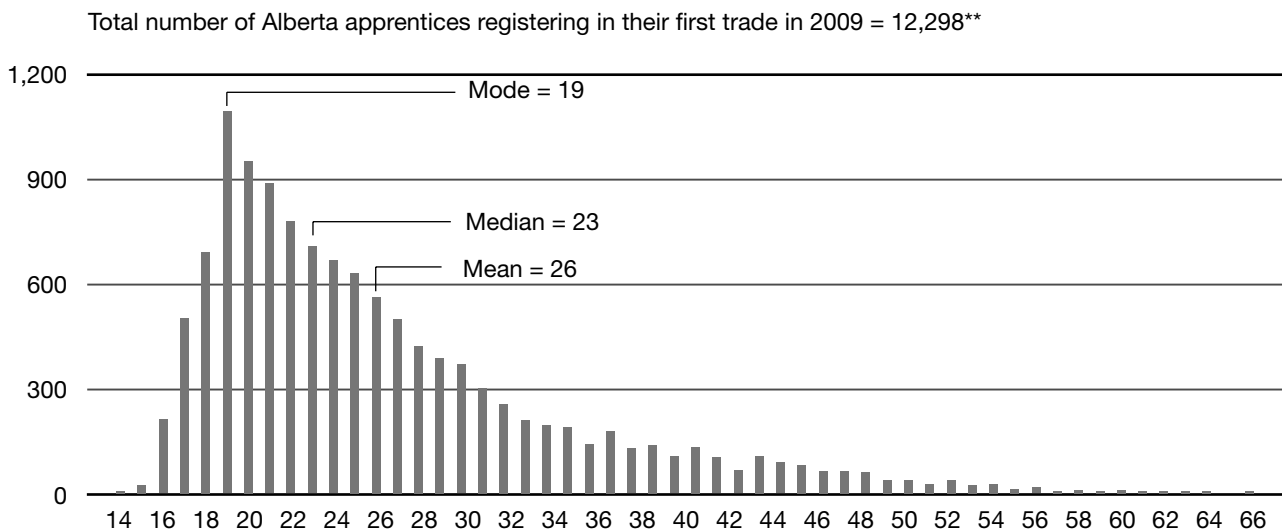

Source: Alberta Advanced Education and Technology

\* This graph represents statistics covering a series of calendar years (January to December).

Chart 2

## Age of Alberta Apprentices on Date of Registration in First Trade, 2009\*

Source: Alberta Advanced Education and Technology

\* Age at date of registration.

\*\* The 12,298 total in the chart above includes only individuals registering in their first trade in Alberta in 2009. This number differs from the total number of new apprentices registered (16,594) as presented in Table 4. In Table 4, the number of new apprentices registered includes those who are returning to do an additional apprenticeship after completing one or more apprenticeship programs in previous years.

Mean - defined as the sum of the ages of all apprentices divided by the total number of apprentices involved, i.e., average age.

Median - defined as the middle age category with an equal number of apprentices younger and older than this group.

Mode - defined as the largest age category or most frequent age of apprentices.

Source: Alberta Advanced Education and Technology

\* Individuals issued more than one certificate in 2009 are counted here only once.

\*\* Indicates that some, not all, branches of this trade have a Red Seal designation.

N/A = Not Applicable.

- Note 1: This number includes the number of Interprovincial Red Seals Issued to Completed Apprentices and Trainees in 2009 regardless of the year the apprentices or trainees completed their training.
- Note 2: A Qualification Certificate is a certificate issued to individuals who, through an assessment of their prior work experience, knowledge and skills in a designated trade or occupation, demonstrate they meet the standards set for certification in Alberta. In 2009, 791 of the 1,055 Qualification Certificates issued, were issued with an Interprovincial Standards Red Seal.
- Note 3: Equivalency documents were issued to recognize a certificate or document (e.g. a trade certificate obtained in another Canadian jurisdiction) as equivalent to a trade certificate granted under the Apprenticeship and Industry Training Act when the skills and knowledge on which that certificate or document is based have been deemed to be equivalent to those of an Alberta certified tradesperson in that trade. In 2008, changes were made to the Equivalency program. Equivalency documents are no longer issued to individuals with a red seal, and red seals are not issued on the new Equivalency documents.
- Note 4: Of the 215 Interprovincial Standards Red Seals issued, 153 were issued to individuals who were certified through the Alberta Qualification program or Occupation Certification program (without completing a trainee program) in a previous year but received the red seal in 2009. The other 62 red seals were issued to individuals who successfully completed the interprovincial examination in Alberta rather than in the jurisdiction in which they were originally certified. These 62 red seals were issued on Qualification certificates.

\* These statistics cover the school year from August 1 to July 31 for each year represented.

Note 1: Delmar College and Eveline Charles Academy provide technical training for hairstylists. The hairstylist trade has a two-year apprenticeship program.

Note 2: Eveline Charles Academy won the bid to provide hairstylist training in the northern part of the province as of August 1, 2009, replacing Marvel College.

Note 3: Effective August 1, 2009, Grande Prairie Regional College assumed responsibility from NAIT for NAIT's Fairview campus and Grande Prairie campus.

Note 4: Enform (previously Petroleum Industry Training Service) trains only crane and hoisting equipment operator - wellhead boom truck, which is a one-year apprenticeship program.

Note 5: Other training providers include:

*Alberta Carpenters Training Centre* - provides carpenter training.*ATCO Electric* - is accredited to provide technical training for its powerline technician apprentices.*Crane Safety Ltd.* - provides crane and hoisting equipment operator - wellhead boom truck training.*FortisAlberta Inc.* - (previously Aquila Networks Canada, Utilicorp Networks Canada and Trans Alta Utilities) is accredited to provide technical training for its powerline technician apprentices.

Note 6: In 2006 and this year the historical numbers were updated to reflect minor corrections to the data. The numbers represented in this board annual report, therefore, may not exactly match the totals represented in previous board annual reports.

\* These statistics are as of December 31, 2009.

N/A = Not all trades have four periods. The N/As indicate where there is no period in that trade.

Note 1: 9th Period Apprentices are those apprentices who have completed, or who have been granted credit for, all technical training requirements in their apprenticeship program. Industry examination and/or work experience/on-the-job training requirements for the trade have yet to be successfully completed.

\* This table represents statistics covering the January to December 2009 calendar year. Technical training in Table 7 is reported as school year. For this table only, the technical training statistics cover the calendar year for comparability within this table.

\*\* Attendance reflects the number of technical training seats occupied.

Note 1: Alberta provides training for apprentices from other provinces and territories where the trade is designated but the jurisdictions are unable to provide technical training due to small apprentice registration numbers. Alberta does not issue these individuals a certificate. They are not counted in Table 5 under Completed Apprentices.

Note 2: Alberta registers apprentices and provides technical training to people from jurisdictions where no program exists. Alberta issues a certificate on completion of the program.

Note 3: Not all apprentices attend technical training in any given year. The reasons for not attending may include:

- Apprentices do not normally attend technical training until they have had at least eight to 10 months of on-the-job training with their employer.
- Some apprentices are graduates of accredited post-secondary technical programs or have completed an apprenticeship program in another trade and have received credit for their technical training.
- Some have successfully completed all of the technical training and have only the required on-the-job training to complete before being eligible to be certified.
- Some prefer to obtain the study material (ILMs – individual learning modules) and learn at their own pace and challenge the industry exam.
- Some are in the Registered Apprenticeship Program (RAP) and attending high school and are not able to attend technical training.

\* The meetings counted in this table are in-person meetings only. Many committees also conduct meetings on a single item or through ballots, faxes or phone conversations. These are not included in this table.

N/A: Not applicable refers to trades where local apprenticeship committees do not exist. Designated occupations do not have local committees.

Note 1: One of the subcommittee meetings was joint, therefore, the meeting is counted in the totals for each of the two committees (Cathodic Protection Provisional Committee and Electrician Provincial Apprenticeship Committee) but is only counted once in the subcommittee total.

Table 11

## Number of Participants in the Registered Apprenticeship Program (RAP) by Trade as of December 31, 2009

Trade	High School	Full Time	Certified (Note 1)
Agricultural Equipment Technician	35	42	15

Source: Alberta Advanced Education and Technology

\* Total number of apprentices registered as of December 31. Apprentices may be registered in more than one trade or branch of a trade within the same year, but are counted here only once.

Note 1: Approximately 1,428 of the rig technician apprentices are from Canadian jurisdictions other than Alberta.

Note 2: Apprentices choose whether or not to disclose their Aboriginal heritage when registering. The total number of Aboriginal apprentices reflected here indicates those who disclosed their Aboriginal heritage. There may be additional apprentices with Aboriginal heritage registered who did not disclose that information.

## Awards and Scholarship Recipients

## 2009 Top Apprentice Awards

	RECIPIENT	TRADE	CITY/TOWN	EMPLOYER
1	Jason Akister	Heavy Equipment Technician	Didsbury	Chinook's Edge School Division #73
2	John Bertrand	Gasfitter (B)	Medicine Hat	Forty Mile Gas Co-Op Ltd.
3	Victor Blake	Plumber & Gasfitter B	Picture Butte	Tak's Plumbing & Heating
4	Kevin Braun	Floorcovering Installer	Lethbridge	Floorright Interiors
5	Jeremy Bryson	Locksmith	Calgary	Calgary Lock & Safe
6	Jerry Bueckert	Parts Technician	La Crete	Frontier Auto And Industrial Supply
7	Daren Carrier	Electric Motor Systems Technician	Spruce Grove	P & H Minepro Services Canada
8	Aaron Cherman	Communication Technician	Hinton	Morad Communication Ltd.
9	Scott Christmas	Structural Steel and Plate Fitter	Linden	Courtney Berg Industries Ltd.
10	Peter Collins	Electrician	Calgary	Canem Systems Ltd.
11	Tara Crooks	Automotive Service Technician	Pincher Creek	Westcastle Motors Ltd.
12	Jans Dening	Outdoor Power Equipment Technician - Recreational Equipment	Barrhead	Ecko Marine Ltd.
13	Nathan Devries	Millwright	Sherwood Park	Suncor Energy
14	Tyson Ehresman	Auto Body Prepper	Calgary	British Sports Car Coach Works Ltd.
15	Sage Ellis	Cabinetmaker	Edmonton	Realsphere Real Estate Services Inc.
16	Benjamin Ferland	Transport Refrigeration Technician	Edmonton	Penske Truck Leasing
17	Shannon Frizzell	Concrete Finisher	Wainwright	Department of National Defence/CFB/ASU Wainwright
18	Mark Furlotte	Crane and Hoisting Equipment Operato - Mobile Crane	Millet	Northern Crane Service
19	James Gardner	Welder	Barnwell	Taber Machine Shop
20	Joel Hamilton	Ironworker - Reinforcing	Edmonton	Ironworkers Apprenticeship Administration Agency
21	Brett Hart	Motorcycle Mechanic	Okotoks	Seitzco Motorsports Ltd.
22	Tanner Hill	Crane and Hoisting Equipment Operator - Wellhead Boom	Grande Prairie	Sanjel Corporation
23	Randy Hills	Water Well Driller	Hinton	Access Waterwells Inc.
24	Timothy Hoogland	Heavy Equipment Technician - Transport Trailer Mechanic	Millet	Aspen Custom Trailers
25	Donovan Jackson	Glazier	Calgary	Alberta Glass
26	Ryan Jakubowski	Outdoor Power Equipment Technician - Power Equipment	Calgary	Agro Calgary
27	Bradley Jorgenson	Lather-Interior Systems Mechanic	Sylvan Lake	Cook Contracting Ltd.
28	Jordan Kuntz	Bricklayer	Arrowwood	Jackson Masonry Ltd.
29	Matthew Kuperis	Refrigeration and Air Conditioning Mechanic	Calgary	Pioneer Air Ltd.
30	Jesse Lefebvre	Roofer	Calgary	Freeze Maxwell Roofing (Calgary) Ltd.
31	Donald Low	Ironworker - Metal Building Systems Erector	Peace River	Don Low Construction Ltd.
32	Bruce Malmstrom	Landscape Gardener	Calgary	A Step Above Landscaping
33	John Marchbank	Instrument Technician	Rocky Mountain House	Delta Controls
34	Jeffery Mattock	Power System Electrician	Calgary	Enmax Corporation
35	Christopher McKenzie	Heavy Equipment Technician - Truck & Transport Mechanic	Edmonton	Caron Transport Systems
36	Jordan Monk	Sheet Metal Worker	Calgary	Cal-Garry's Sheet Metal Ltd.
37	Gregory Moody	Cook	Lethbridge	Mocha Cabana Ltd.
38	Herman Neustaeter	Machinist	La Crete	Neustaeter Mobile Inc.
39	Tyler Nielsen	Rig Technician	Vernon	Impact Drilling Ltd.
40	Emil Ohler	Sprinkler Systems Installer	Calgary	Stoughton Fire Protection Ltd.
41	Lars Poulsen	Gasfitter (A)	Wainwright	Department of National Defence/CFB/ASU/ Wainwright
42	Lorna Price	Ironworker - Structural/Ornamental	Edmonton	West Edmonton Mall Engineering & Maintenance
43	Jeff Reid	Auto Body Refinisher	Edmonton	Eastwood Autobody
44	Heidi Rudyk	Hairstylist	Two Hills	Main Street Beauty Salon
45	Philip Setter	Ironworker	Cochrane	Ironworkers Local 725
46	Murry Siemens	Welder - Wire Process Operator	Tofield	Sunshine Playground Equipment Ltd.
47	Murray Simpson	Painter and Decorator	Camrose	Nu-Coat Painting & Decorating
48	David Sophone	Appliance Service Technician	Calgary	Sears Canada Inc (Service Dept)
49	Matthew Spicer	Agricultural Equipment Technician	Vermilion	Webb's Machinery (Vermilion)
50	Roger St. Pierre	Steamfitter-Pipefitter	Grande Prairie	Metalex Metal Buildings Inc.
51	Collin Stolte	Insulator	Alhambra	Westerra Insulation Inc.
52	Daryl Stratmoen	Power Lineman	Wetaskiwin	FortisAlberta Inc.
53	Kevin Sweetman	Heavy Duty Equipment Mechanic - Off Road	Fort McMurray	Syncrude Canada Ltd.
54	Kevin Travis	Boilermaker	Airdrie	Propak Systems Ltd.
55	Jordan Van horne	Crane and Hoisting Equipment Operator - Boom Truck	Sherwood Park	City of Edmonton Public Works
56	Murray Vetsch	Carpenter	Bezanson	Peace Country Maintenance
57	Veronique Viau	Baker	Edmonton	Fuss Cupcake
58	Kelly Warkentin	Plumber	Red Deer	Bruin's Plumbing & Heating Ltd.
59	Dean Warren	Recreational Vehicle Service Technician	Leduc	Western RV Country
